Common Market Summit

Pompidou Warns EEC On Cost of U.K. Entry

By Drew Middleton

THE HAGUE, Dec. 1 (NYT).—French President Georges Pompidou today warned the leaders of the European Economic Community that the cost of British entry might be the community's "weakness and fragmentation."

Mr. Pompidou's largely negative approach to the question of British admission was accompanied by a suggestion that the summit conference "raise the hopes of a Europe mistress of her own fate" and independent of the United States and the Soviet Union.

Chancellor Willy Brandt of West Germany countered by suggesting that the conference tell Britain and other applicants for admission that it will be possible to start negotiations next spring.

A French response to Germany's "clear will" for British admission would win Bonn's appreciation, Mr. Brandt said. "The German parliament and public expect me not to return from this conference without concrete arrangements" on the expansion of the community to include Britain and other applicants.

'Moderately Optimistic'

This confrontation between the two most powerful members of the community did not, in the words of Netherlands Foreign Minister Joseph Luns, "leave a very favorable impression." He and other statesmen are "moderately optimistic" that tomorrow's second session of the summit conference will produce a more tangible result than today's confrontation.

The setting for the summit meeting, the Cap Ridderzaal, or hall of knights, symbolized the continuity of European history.

The vast hall, inaugurated on Christmas Day, 1295, dwarfed the oval table, covered with a rose-red cloth around which the ministers sat. High above the table was the vaulted, timbered roof and around the walls hung the banners of the 11 provinces of the Netherlands and the national flag.

The banners and their coats of arms spoke of recurrent European civil wars culminating in the great conflicts of 1914 and 1939. But, despite their unspoken warning, the old rivalry between Frank and Teuton flared anew.

Echoes of De Gaulle

Mr. Pompidou, who had proposed the summit meeting, appeared to echo his predecessor, Gen. Charles de Gaulle, when he told the ministers that the purpose of the meeting was to offer hope of European independence of the superpowers.

The French have long believed, and have recently revived the claim, that Britain's admission would increase American influence on European affairs.

This was not what the Germans, the Dutch or the Italians had come to hear. Mr. Pompidou spelled it out.

The time has come, he said, to tackle the question of British entry "and to set ourselves preliminary conditions to the opening of negotiations as well as the modalities of negotiations."

But, he continued, "are we prepared to open the community to Britain and to other candidate countries at the cost of weakening and fragmenting it?

"Do we, on the contrary, intend to continue strengthening the community and subordinate the applications for membership to what has already been achieved and must be undertaken?"

This statement was interpreted by other delegations as meaning that the French position was unchanged: the Six must agree on the agricultural financial settlement demanded by France and a common position on negotiations before talks with Britain and other applicants—Norway, Denmark and Ireland—begin.

The French want to achieve this position in negotiations among the six members and then turn over the direct talks with Britain and other applicants to the EEC.

Mr. Pompidou's words, which reminded a Belgian participant of Gen. de Gaulle's "delphic utterances," were reinforced later by a French spokesman. He said that France "insists" on an agreement on agricultural financing before the end of the year as a precondition for talks with Britain.

France, the spokesman added, would be willing to "stop the clock" in the EEC discussions. This means that discussion on all other Common Market issues would be halted until agreement is reached on agricultural financing.

Mr. Pompidou's oblique references to political unity were couched in terms whose vagueness irritated some delegations.

These diplomats thought they heard the echoes of Gen. de Gaulle in Mr. Pompidou's only comment on political unity for Europe.

"I am convinced," he said, "that with the Treaty of Rome as a starting point, and in view of what we have already done to apply it and extend it, Europe has a chance of uniting and finding at all levels, including the political, the means to develop and to play an influential role enabling it to speak with a louder voice in all fields of international policy."

The French president asked questions directly and by implication. Diplomats tonight pondered whether today's negative position, with its overtones of pure Gaullism, would be, or, in view of the French government's political position, could be adjusted tomorrow to a more "realistic" position.

"The trouble with the French," an Italian diplomat said, "is that

...IO, Dec. 1 (UPI).—An official Army account written one week after the alleged massacre at My Lai listed none of the 128 enemy deaths the Army reported as having taken place in the village itself, the Chicago Tribune said today in a copyrighted story.

The Tribune said an account of the battle written for the 11th Brigade newspaper by Jay A. Roberts, information specialist for the brigade, said all of the reported deaths took place in areas surrounding the village.

According to the official Army account of the battle, all of the battle deaths took place when contact was made with the Viet Cong as units supporting Company C, which made the actual attack on the village, swept the countryside.

The Tribune quoted Arthur Dunn, former 11th Brigade press officer, as saying that the story represented the official Army version of the attack.

Lawyer Says Captain Issued 'A Lawful Order' at Village

By Peter Kihss

NEW YORK, Dec. 1 (NYT).—F. Lee Bailey, a civilian lawyer for Capt. Ernest L. Medina, said yesterday that the officer had been told the village of Song My, South Vietnam, was "stacked" with Viet Cong soldiers and would be clear of women and children when his infantry company assaulted it.

A current Army investigation of the alleged massacre there on March 16, 1968, has led to court-martial charges against a lieutenant in the captain's company for alleged premeditated murder of 109 civilians and preliminary allegations against a sergeant for assault with intent to murder 30 persons.

The Boston lawyer, interviewed by telephone in Columbus, Ohio, said he had been retained to represent Capt. Medina, who is not under any charges.

Mr. Bailey was defense counsel in the Green Berets case, in which the Army charged six Special Forces officers with the murder of a Vietnamese.

Army Secretary Stanley R. Resor announced Sept. 29 that that case was being dropped because the Central Intelligence Agency refused to provide witnesses. Mr. Bailey had represented Capt. Robert F. Marasco.

No 'Butcher' Orders

"The company commander," Mr. Bailey said yesterday, "received no orders to butcher anyone or to kill any women and children—and he issued none."

In response to questions, Mr. Bailey said:

● Capt. Medina received a "caution order" by radio only after the attack started, informing him that there were in fact women and children in the area.

● Capt. Medina himself shot someone who "turned out to be a woman" after a helicopter pilot radioed that a Viet Cong was lying on the ground "and moving with a weapon." The woman was killed.

● The platoon led by Lt. William L. Calley jr., who has been charged by the Army with murder, was "at the other end of the village" and not under Capt. Medina's direct observation.

● After the attack, Capt. Me-

Injunction Asked Against Printing Atrocity Stories

WASHINGTON, Dec. 1 (Reuters).—A military court today declined to order an immediate halt to newspaper reports bearing on the alleged My Lai massacre in South Vietnam.

After hearing arguments in public from prosecuting and defense lawyers in the case, the U.S. Court of Military Appeals adjourned without giving a decision on their joint application for a temporary injunction.

An injunction would bar all news media from publishing potential evidence in the court-martial of Lt. William L. Calley on charges of murdering 109 Vietnamese civilians at My Lai in March, 1968.

Senate Votes, 62-30, to Reduce Oil-Gas Depletion Allowance

By Frank C. Porter

WASHINGTON, Dec. 1 (WP).—In a surprisingly lopsided vote, the Senate beat back efforts to keep the oil and gas depletion allowance at its present 27 1/2 percent level today.

But it also defeated a motion to cut the allowance to the 20 percent contained in the House tax-reform bill. Thus it ratified the 23 percent figure approved by the Senate Finance Committee.

The 62-to-30 tally against an amendment by Sen. Allen J. Ellender, D., La., to maintain the status quo was a resounding victory for liberal Democrats and a sprinkling of Republicans from non-oil states.

For more than a decade they have been frustrated in their attempts, usually led by former Sen. Paul H. Douglas, D., Ill., to pare the 43-year oil-depletion allowance. The most votes they could muster against the allowance were 35 in 1964.

A close vote had been predicted for the Ellender amendment. The unexpectedly heavy vote against it may have stemmed from the depletion cut's emergence as a symbol of the Senate's willingness to grapple with tax reform.

"If we fail on this . . . we might just as well tell the American people there will be no tax reform from this Congress," Sen. John J. Williams, R., Del., admonished his colleagues.

If the depletion cut is dropped from the bill, Sen. William Proxmire, D., Wis., warned, the tax-reform bill "will be considered a hypocritical, meaningless mockery . . . a phony, a fake, a pretense."

Despite its symbolism and the strong emotions generated by the debate, the reduction in the allowance to 23 percent would provide only a moderate increase in revenue—an estimated $175 million a year. The House cut to 20 percent would provide some $345 million more.

Fight by Oil States

The fight by oil-state senators to keep the depletion allowance intact was led by Sen. Ellender and Sen. Russell B. Long, D., La., Finance Committee chairman and floor manager of the tax-reform bill.

They argued that the full depletion allowance is badly needed as an incentive to further exploration at a time when the nation's domestic gas and oil reserves are declining relative to future needs.

Sen. Abraham A. Ribicoff, D., Conn., said, however that petroleum companies pay only 21 percent of net income in federal income tax, against an average of more than 37 percent for all corporations.

Even if the Gore measure is unchallenged or supported by Senate vote, it still must be approved by House conferees and then adopted by a House vote.

The present outlook is for the Senate to complete its action on the tax-reform bill before Christmas. The measure then must go to conference with the House to reconcile differences. The revised bill then must be approved by both houses.

Thus the legislation is not expected to be signed into law by President Nixon until January.

Exemption for Those Abroad Faces Debate

WASHINGTON, Dec. 1.—The Senate is expected to debate separately an amendment to the tax-reform bill that cuts annual tax exemptions to $6,000 for Americans living abroad.

The amendment, offered by Sen. Albert Gore, D., Tenn., and written into the measure by the Finance Committee, is expected to be challenged by Texas Republican Sen. John Tower during the Senate's debate on the reform bill.

Sen. Gore's amendment would slash drastically the present exemptions of $20,000 for Americans living overseas for 17 of 18 consecutive months and $25,000 for those abroad for three or more years.

If the anticipated effort to strike the amendment from the bill is adopted, that would keep the present exemption levels. But if

Warsaw Pact Meeting on Bonn

MOSCOW, Dec. 1 (WP).—The Soviet Union and its six Warsaw Pact allies will gather here this week for a summit conference aimed at setting a new Communist-bloc policy toward West Germany and the wider issue of European security.

Tass said the conference will convene "to exchange views on topical international problems." Sources indicated that the opening session is set for Wednesday with some preliminary discussions scheduled for late tomorrow.

Ex-Sen. Brewster Indicted on Bribe

WASHINGTON, Dec. 1 (UPI).—Former Democratic Senator from Maryland Daniel B. Brewster was indicted by a Federal Grand Jury today on charges of bribery to influence his vote on postal rate legislation.

Attorney General John Mitchell announced a ten-count indictment was returned in U.S. District Court here against Mr. Brewster, the Chicago-based mail order house, Spiegel Inc., and its Washington lobbyist, Cyrus T. Anderson.

Mr. Brewster, who served from 1962 to 1968 in the Senate, was charged with receiving five payments totaling $24,500 from the Spiegel Co. and Mr. Anderson to influence his "action, vote and decision on postage rate legislation" while serving on the Senate Post Office and Civil Service Committee.

Negative Reply to Mansfield

U.S. Won't Cut Troops In Europe Before 1972

WASHINGTON, Dec. 1 (AP).—The United States has no intention of withdrawing American soldiers from Europe during the fiscal years 1970 and 1971, the State Department declared today.

These troops, press officer Carl Bartch told a news conference, "are in Europe in support of our own security interests and pursuant to our NATO (North Atlantic Treaty Organization) commitments." The Nixon administration, Mr. Bartch recalled, is "already on the record as saying that it has no intention to reduce U.S. strength in NATO in the fiscal years 1970 and 1971."

AP.

Sen. Mike Mansfield

This means there would be no reduction until after June 30, 1972. The fiscal year runs from July 1 through June 30. The United States is now operating in its 1970 fiscal year which will end next June 30.

Laird's Speech

This, Mr. Bartch said, was stated by Defense Secretary Melvin R. Laird in a television interview in Toledo, Ohio, on Sept. 23. "This still is the administration's position," the spokesman said in response to a question.

The issue came up at Mr. Bartch's daily press briefing in the wake of a resolution submitted in the Senate by Majority Leader Mike Mansfield, D., Mont., calling for a "substantial reduction" of American forces in Europe.

Sen. Mansfield's resolution was submitted on the eve of the departure of Secretary of State William P. Rogers to attend a Ministerial Council meeting of the Atlantic Alliance in Brussels which starts Wednesday.

Sen. Mansfield called the current 315,000-man force a "waste-

At SALT Meeting

Russians Reported Ready To Discuss MIRV Test Halt

HELSINKI, Dec. 1 (UPI).—U.S. arms negotiators are cautiously sounding out the Russians on a moratorium on flight testing missiles with multiple nuclear warheads, diplomatic sources said today.

Soviet officials, meanwhile, announced that Moscow is ready to discuss the possibility once America makes a formal proposal.

American delegates, so far, have made only an oblique reference to a test moratorium at the Strategic Arms Limitation Talks (SALT).

Chief Soviet negotiator Vladimir S. Semyonov has not yet reacted to the hint at the five meetings held since the preliminary discussions began Nov. 17.

But diplomatic sources said the Russian comment outside the conference room may constitute an equally cautious "feeler" in possibly inviting a formal proposal.

[A Soviet spokesman denied today the Soviet Union has taken a position on the question of a ban on testing multi-warhead rockets, the Associated Press reported from Helsinki.

[On the American side, it was also reported highly unlikely that the U.S. delegation would propose a freeze on testing MIRVs.

[The Soviet spokesman declared: "The idea has not been discussed. It has not been raised. The Soviet side has no position on this."]

The next working session takes place tomorrow morning. The preliminary phase is expected to last another ten days to two weeks.

The United States is considering proposing a moratorium on flight testing the new intercontinental rockets with as many as ten independently guided warheads, called MIRVs, for Multiple Independently Targetable Re-entry Vehicles.

This could be done before concrete negotiations start next year.

A moratorium on testing the rockets would give both nuclear giants time to attempt negotiations on freezing MIRV deployment, thus preventing a dangerous new spiral in the nuclear arms race.

The United States now believes it could satisfactorily verify a moratorium with national detection methods such as radar, satellites and communications monitoring.

A moratorium also would be a relatively simple tacit understanding without requiring the legal drafting of any formal accord.

Warrants Issued for 3 in Tate Murders

LOS ANGELES, Dec. 1 (AP).—Police said today that they have issued warrants for the arrest of two women and a man in the slaying of seven people, including actress Sharon Tate and three of her jet-set friends.

Police Chief Edward M. Davis told a news conference that he expected "four or five other persons to be named in indictments being sought from the Los Angeles County Grand Jury."

The announcement of the warrants was the first break in an intensive investigation since Miss Tate, her friends and an acquaintance of her caretaker were slain Aug. 9 at the actress's Bel-Air home.

The warrants also accused the man and two women of being involved in the slaying of Leon and Rosemary La Bianca at their home on Aug. 10.

Named in the warrants are

Slaying of 5 Is Linked to Second Crime

Charles D. Watson, 24, in custody in Texas, and Patricia Kernwinkle and Linda Louise Kasabian, both at large.

"Investigation led detectives to the conclusion that the murders in both cases were committed by the same group," Mr. Davis said.

Mr. Davis said that the three named in the warrants were living at the Swan movie ranch west of Chatsworth, Calif., at the time the murders were committed and later moved to the Barker ranch near Death Valley National Monument in Inyo County, Calif.

Miss Tate, 26, was the blonde pregnant wife of Polish director Roman Polanski, master of suspense, the macabre, the grotesque. They were members of a young, fast-living international set of movie people and hangers-on. They gave frequent parties, friends said, sometimes including hippie types they barely knew.

Slain with Miss Tate were hair stylist Jay Sebring, coffee heiress Abigail Folger, Polish playboy Voityck Frokowsky and Steven Parent, a friend of the caretaker at the Polantskis' house.

The Tate killings were termed "bizarre" and "ritualistic" by police. The word "pig" was scrawled on the door in blood.

The La Bianca stabbings were termed "copycat killings" by police, who at first said they weren't sure whether the cases were connected.

The word "death" was

Greece Cautions 7 Allies Not to Back Its Expulsion

ATHENS, Dec. 1 (NYT). — The government today cautioned seven of its European allies that Greece's suspension from the Council of Europe might entail trade sanctions against them.

The foreign ministers of the 18-nation Council of Europe meet in Paris next week. They are expected to vote on a motion asking Greece's suspension for suppressing democratic freedoms after the 1967 military coup.

Minister of Economic Coordination Nikolaos Makarezos delivered the trade sanctions warning in consecutive meetings today with the envoys of Britain, West Germany, Italy, Belgium, Holland, Denmark and Norway.

Informed sources said Mr. Makarezos warned that if Greece is ousted from the Council of Europe, it may decide to cut its imports from the seven countries to the level of its exports to them. Greece imports $527 million from the seven and exports $161 million.

The Greek regime has reacted strongly to the possibility of suspension from the Council of Europe. Britain, which has expressed official skepticism of the Greek regime's claims that it intends to restore democracy if the Council of Europe gives it more time, was officially rebuked by the Athens regime today.

An official press announcement scored "the unbridled partisan campaign waged by Britain's Socialist government against Greece."

It also deplored the publication by a London Sunday newspaper of the confidential report of the European Commission on Human Rights on alleged torture in Greece.

Informed sources said the United States, in view of Greece's strategic position in the eastern Mediterranean, suggested to its allies that they give the Greek regime another chance since Greece's suspension from the Council of Europe might weaken NATO.

The economic sanctions would peg Greece's imports from each country to the value of its exports to that country.

Britain, West Germany and Italy would be hardest hit if the threat were carried out.

Britain Accused

ATHENS, Dec. 1 (AP).—The Greek government accused Britain's Socialist government today of waging what it described as an "unbridled partisan" campaign against Greece.

In a commentary issued by the Press department of Premier George Papadopoulos's office and attributed to "authoritative circles," it also said that a section of the British press was "showing unethical violence" against Greece "presumably under remote-control guidance." It added:

"Certain British circles are the least entitled to invoke cases of torture when they seem to forget that there exists a huge file in the archives of the Council of Europe itself officially demonstrating the inconceivable methods of torture in which Britons became involved in Cyprus, including the hanging of young patriots."

Swiss Protest Algeria Note To UN on Trial

GENEVA, Dec. 1 (NYT).—Switzerland accused Algeria today of "inadmissibly interfering" in Swiss internal affairs in connection with the trial of three Palestinian terrorists who shot up an Israeli airliner at Zurich airport last February.

Willy Spuhler, Swiss Foreign Minister, called in Mohammed Yousfi, the Algerian Ambassador to Switzerland, to express his government's "astonishment" over a note sent to the United Nations by Abdelaziz Bouteflika, Algerian Foreign Minister.

An official announcement said that the Swiss government "categorically rejected" the allegations in the Algerian note that the three Arabs were not being given a fair trial. It added that Mr. Spuehler lodged a protest with the ambassador.

Meanwhile, at the trial in Winterthur, near Zurich, two Swiss witnesses testified that the fourth member of the Arab commando group, Abdel Mohsen, had surrendered and was unarmed when he was shot dead by Mordechai Rachamim, a security agent aboard the El Al Boeing-707.

But Mr. Rachamim said the witnesses, a fireman and a policeman who were both on duty at the airport, were mistaken in believing the terrorist no longer had a gun in his hand. Charged with murder in extenuating circumstances, the Israeli agent is pleading self-defense.

The three Arab commandos, two men and a woman, are charged with willful murder. The co-pilot of the El Al plane died of bullet wounds received during the attack.

Associated Press.

Pompidou Warns Market On Cost of British Entry

(Continued from Page 1)

they think this is 1962 and that they have the Germans in their pockets."

Four Arguments

Mr. Brandt's speech emphasized the turn in German policy away from the old reliance on cooperation with France. He put forward four arguments for the expansion of the EEC to include the United Kingdom. These were:

1. Avoiding the question of expansion threatens to paralyze the community.

2. The common interest is the enlargement of the community "when we are trying to bring East and West more closely together."

3. The community must expand beyond the Six if it is to "hold its own economically and technologically" with the United States and the Soviet Union.

4. Those who fear that "the economic strength of the Federal Republic of Germany" could cause an imbalance in the Common Market should favor Britain's entry for this reason.

Europe cannot become "what it should and can be" without the admission of Britain and the other applicants, Mr. Brandt declared.

Direct Proposal

Where Mr. Pompidou had been indistinct on the question of European political unity, Mr. Brandt was direct. He proposed that the foreign ministers of the six members be instructed to "draft an agreement for the gradual development of our community, and this on the assumption that it will be enlarged."

Where Mr. Pompidou emphasized European independence of the United States, Mr. Brandt stressed "the participation of our American allies" in seeking greater security and "more practical cooperation between East and West."

Two key differences between Paris and Bonn over agricultural financing emerged from Mr. Brandt's speech.

Germany will be able to agree to financial agreements if it is sure that discussions on the surplus problem, that is to say, the reform of agricultural market regulations, are begun immediately.

The presence of an enormous surplus in butter and other agricultural products is one of the major impediments to an agreement among the Six on a common agricultural policy.

Germany sees the connection between an agreement on farm finances and Britain's entry, Mr. Brandt pointed out, but the farm financing "will have to remain adjustable."

To Americans, this obscure point in European economic politics may have a greater effect on the future development of Europe than anything Mr. Pompidou has to say about European independence or Mr. Brandt about British admission.

Federalists Demonstrate

THE HAGUE, Dec. 1 (NYT).—Youthful European federalists, chanting "Enough blah-blah" and proclaiming Marx a European federalist, scrapped with Dutch mounted police today outside the former hunting lodge where European leaders assembled for a summit conference.

They bore a coffin symbolizing the demise of the ideal of European unity and staged a sit-down demonstration in the street to make the point that governments have lost touch with the people.

Counsel Says Medina Gave Valid Order

Denies He Told Men 'To Butcher Anyone'

(Continued from Page 1)

dina was asked to report on civilian casualties. His checkup indicated that there had been "25 to 28."

Remaining Silent

Capt. Medina, who has been stationed since last December at Fort Benning, Ga., has repeatedly declined to answer newsmen's inquiries since the investigation became known, and so has his Army counsel, Capt. Edwin J. Richards.

A native of Springer, N.M., Capt. Medina is 33, and has served more than 13 years in the Army. He has won the Silver and Bronze Stars, the Army's third and fourth highest awards, for gallantry in action.

Mr. Bailey said he conferred at length with Capt. Medina last Friday. On Saturday night, Mr. Bailey said, he telegraphed President Nixon asking for a conference with White House staff members.

"I said I thought this case and especially the case of Captain Medina," Mr. Bailey said, "had very broad implications far transcending any individual. The company commander gave a lawful order, and now they are threatening to punish him for it. This could completely destroy the efficacy of any ground force in Vietnam."

"He was told he was to go into this village, which was thought to be stacked only with the 48th Battalion of Viet Cong," the attorney said. "The assault was to be held off until 7:30 a.m. because women and children cleared the village at 7, to go to the market and the rice paddies.

"An artillery barrage by 105-millimeter howitzers was to be laid into the village at 7:30, and to last ten minutes. At 7:40, he was to take his company into the village, about 105 men.

"He was told he could expect to confront a battalion of 250 to 280 men—and they were expected to be the only ones in the village.

"This was to be a free-fire zone. After the artillery barrage, it was to be raked by suppressive fire from helicopter gunships."

Orders From Commander

Mr. Bailey said Capt. Medina had received these orders from Lt. Col. Frank A. Barker jr., commander of the task force. Col. Barker was killed in an air accident about three months later, in June, 1968.

The task force consisted of three rifle companies and an artillery battery, including Capt. Medina's Company C, 1st Battalion, 20th Infantry, 11th Light Infantry Brigade. Its mission was to search and clear areas infiltrated by Viet Cong and North Vietnamese Army soldiers still threatening cities after the previous month's Lunar New Year offensive.

The night before the attack, Mr. Bailey said, Capt. Medina "briefed the men to destroy the village and to destroy the buildings and to destroy their livestock—an unusual order but it was given to him by Colonel Barker—and to expect to be outnumbered and to go in shooting like hell."

Company C had "suffered a disastrous encounter with a minefield and lost 18 men 20 days before," Mr. Bailey said. They were "gruesome casualties."

"On that basis," Mr. Bailey went on, "he [Capt. Medina] tried to raise the morale of the men and told them he expected a very bloody battle. He at no time told anyone to kill women or children or shoot at any of them.

"As far as he knows, that was not done. There was no deliberate lineup of people. They went through with machine guns blazing. They were to sweep the village clean of people. It was an order in military fashion."

The orders had been that "anything armed was to be shot, no matter who was holding the weapon," Mr. Bailey said. This, the lawyer said, led to one killing by Capt. Medina.

"He did shoot someone that turned out to be a woman," Mr. Bailey said. "He didn't know it was a woman. . . . That was the only incident of which he has knowledge that anyone other than a Viet Cong was shot within his view."

Number of GIs in Vietnam At Lowest Point Since 1

By Ralph Blumenthal

SAIGON, Dec. 1 (NYT).—United States troop strength in South Vietnam has dipped to 479,500 soldiers, its lowest level since December, 1967, military headquarters announced today.

The total, as of last Thursday, represented a decline of 4,900 from the week before, headquarters said.

The latest departing units included the final elements of the 3d Marine Division and the remaining support squadron of Marine Aircraft Group 36; the last National Guard unit, Company D, 151st Infantry (Ranger); Company D of the 75th Infantry, and Marine Air Support Squadron 2.

Not counted in the remaining U.S. troop strength figures were about 26,000 Navy men of the 7th Fleet and 600 members of the U.S. Coast Guard.

In war action, U.S. military authorities announced, three Americans were killed and one was wounded when a helicopter was hit by enemy ground fire and crashed near Phuoc Long, 75 miles northeast of Saigon, on Saturday.

Crewmen of another helicopter escaped injury when their craft was shot down over Camau, in the Mekong delta, 175 miles southwest of Saigon.

The two crashes brought the total of helicopters reported downed in the war to 1,404.

In other action, enemy sappers slipped through the barbed-wire perimeter of a U.S. Army combat support unit eight miles northwest of Cam Ranh, just before midnight last night, wounding three Americans and inflicting light damage, U.S. authorities said.

Before being driven off an hour later, the infiltrators struck the base with ten rounds of mortar fire and planted 15 satchel charges that were later found by the Americans, headquarters reported. Enemy losses were unknown.

The allied Special Forces camp at Bu Prang near the border, which has t enemy pressure for m month, was hit by roc tween 1 a.m. and 11 morning. Only light da installation was repo

Westmore Says Bon Halt Hur

WASHINGTON, Dec Gen. William C. W former military com Vietnam, says the U would be freer if the U had continued its bomb Vietnam.

But Gen. Westmo Army Chief of Staff, vocate a resumption of this time and agree dent Nixon's policy of major burden of the South Vietnam.

Gen. Westmoreland views to the House De priations subcommitte in testimony the made public today.

He thinks the pres wearing down North the Viet Cong but is period of fighting ahe United States being keep military forces several years.

As for the past, Ge land said he thinks States underestimated of the enemy and the ability of South deal with it.

Senate Panel Orders Probe In S. Vietnam

WASHINGTON, Dec. 1 (AP).—The Senate Foreign Relations Committee said today that it would send two investigators to Vietnam this week to look into "the prospects for Vietnamization of the war and the general political and military situation in Saigon and the field."

Sen. J. William Fulbright, D., Ark., committee chairman, said that the two investigators were not being given specific instructions to look into the alleged massacre of civilians by American soldiers but weren't being told to ignore it either.

Sen. Fulbright said that the hearings would be held next month.

He said that the committee itself might look into the massacre story.

"I am going to ask the Foreign Relations Committee what they think about discussing this matter," the Arkansas Democrat told newsmen.

He added, however, that any investigation by his committee would try to go beyond any individual charges and conduct to take a look at "what the long, protracted warfare we are engaged in is doing to this country."

The committee is expected to open hearings some time this month into administration policy in Vietnam and into a half dozen or so resolutions that have been introduced in the Senate calling for faster troop withdrawal and de-escalation.

The White House was talking down the likelihood of any judicial or outside-the-government investigation by a national commission or the like. Asked whether any consideration was being given to such a review, White House press secretary Ron Ziegler replied:

"No. I know of no plans to do that."

Mr. Ziegler also told questioners that the White House had received a telegram from attorney F. Lee Bailey regarding representation of Capt. Ernest Medina. He said that the President was not asked to receive Mr. Bailey and the whole matter had been referred to the Department of Justice.

On the Senate floor today, Sen. Robert J. Dole, R., Kan., said that the My Lai incident was "being used as the latest tool by those strongly opposed to administration policy."

He said that the allegations were "careless and injurious to the character of the American fighting man."

Sen. Dole said that a member of his staff had talked to high-ranking defense officials and done a report which, he said, showed that everything possible was being done to indoctrinate GIs in Vietnam in the humane handling of civilians.

British Expert Arrives

WASHINGTON, Dec. 1 (UPI).—The White House announced today that a British counter-insurgency expert is in Washington to report to the administration on a special study he made of the political and military situation in Vietnam.

The specialist is Sir Robert Thompson, architect of the British victory over Malayan Communist guerrillas in the late 1950s and head of the British Advisory Mission to South Vietnam from 1961 to 1965.

Mr. Ziegler said that Sir Robert had checked into the progress of U.S. transfer of military responsibility to the South Vietnamese and of the pacification program in the countryside. Sir Robert conferred with Mr. Nixon on Oct. 17 before making the trip.

U.S. Faces Hardest Bargaining On Labor Contracts in Years

By Damon Stetson

NEW YORK, Dec. 1 (NYT).—The nation is facing a period of tough and perhaps abrasive collective bargaining in the months ahead as unions attempt to offset sharply rising living costs and to make new gains for their members.

Several railroad shopcraft unions have threatened a strike Wednesday that could touch off a nationwide railroad shutdown. New York City was hit last night with a strike by 2,000 sanitationmen employed by private carters. And about 140,000 electrical workers are starting the sixth week of a major strike against the General Electric Co.

[America's railroads threatened yesterday to shut down rail service throughout the nation if four shopcraft unions walked off the job at midnight tomorrow, United Press International reported.

[The National Railway Labor Conference said that it would have "no alternative but to discontinue service throughout the country if the strikes occur."]

These labor disputes could be only a foretaste of difficult struggles in the year ahead, when more than five million workers in such major industries as automobiles and trucking will be pressing for substantial wage and benefit increases.

Union members, whose buying power has been drastically reduced by a cost-of-living rise of more than ten percent over the last two years, are pressing for bigger gains than ever despite pleas of the Nixon administration for moderation.

The median wage and benefit increase for major contracts negotiated in the first nine months of this year was 8.1 percent annually, up from 6.6 percent last year and the highest level in several years. This trend is running directly contrary to the administration's efforts to cool the economy.

In efforts to slow the wage drive, President Nixon and Secretary of Labor George P. Shultz have suggested that unions may price their employers and their own labor out of the market if they continue to negotiate high cost settlements.

But George Meany, president of the American Federation of Labor-Congress of Industrial Organizations, says that no labor leader is inclined to limit demands because of some future prospect of a slowing economy. "If he does," Mr. Meany says, "he isn't going to be the head of that union very long."

"I've never felt as much pressure from rank and filers for more money," agreed one top labor official. "And if we don't produce, they're going to get leaders who will."

The major contract negotiations ahead will involve New York City transit workers, whose contract expires on Dec. 31, seeking a 30-percent pay increase; 450,000 truck and freight-hauling drivers, whose contracts expire March 31; more than a million construction workers, with bargaining next spring; 70,000 rubber workers, with contracts expiring in late April; 75,000 meat-packing workers, whose contract runs until September; more than 600,000 auto workers, whose contract expires Sept. 14, and 100,000 farm equipment workers, whose contracts will be negotiated next fall.

Walter P. Reuther, president of the United Automobile Workers, has emphasized that his union would go to the bargaining table next year to get equity for its members and said that the auto workers did not care what the attitude of business or the Nixon administration might be.

"The source of the [inflation] problem is not the fact that American workers are fighting for their legitimate wage claims," he said. "The source of the problem is that the giant corporations of America who control the marketplace have been going after higher and higher profits through higher and higher prices."

Mr. Shultz takes a different view. He says it is not correct to characterize the present situation as an inflationary spiral, carrying the implication that past increases in prices and wages keep feeding on themselves.

He blames the current inflationary problems on the "extremely expansionary fiscal and monetary situation in 1967 and 1968." Mr. Shultz says that the solution lies in changing that policy and he contends that the administration has done that this year.

Warrants Issued for Three In Murder of Tate, 6 Others

(Continued from Page 1)

written in blood on the refrigerator door in the La Bianca home, apparently with the heel of the killer's hand. It was not widely known at the time that "pig" had been scrawled on the Tate door.

Mr. La Bianca was the owner of a food-market chain.

Mr. Davis told the news conference that security required that "no additional information be published at this time."

However, he offered to answer questions.

In answer to one, he said that indications are that none of the suspects knew the victims in either the Tate case or the La Bianca slayings.

What led to the arrest warrants?

"Tenacious investigation by detectives."

Asked whether the suspects lived in a commune and if so, whether it had any religious connotation, Mr. Davis said: "Yes, they appeared to live together in a commune. Perhaps it could have a religious connotation, depending on your interpretation."

He refused to say whether drugs were involved because "this might prejudice the case against the defendants."

What brought them to the scene?

"They did not come during a party, to the best of our knowledge," the chief replied. "They had been there on a previous occasion when different people lived at this address."

Mr. Davis added that "the motives are something difficult to perceive. There was no economic motive in the Tate case," though there was a minor economic motive in the La Bianca case.

All the suspects, he said, are Caucasian and were "either at the crime or had some part in the transportation to the areas of the crimes."

The weapons used in the murders have been found, but Mr. Davis would not say what they were.

All three rode motorcycles, but the chief said he could not describe them as members of the "Hell's Angels" motorcycle gang.

No Troop Cut In Europe

(Continued from Page 1)

ful and dangerous use" of American resources.

Mansfield's Resolution

The United States is "beginning to scrape the bottom of the barrel" for revenue to deal with national problems, he said. "Other nations have come to realize that if they are to accomplish the essential tasks at home it may be necessary to concentrate on only the essential tasks abroad," Sen. Mansfield said in a speech to the Senate.

"In my judgment it is long past time for us to face the facts of our situation and reach the same conclusion."

Sen. Mansfield made the statement as he introduced a resolution which would have the Senate declare that "a substantial reduction of U.S. forces permanently stationed in Europe can be made without adversely affecting either our resolve or our ability to meet our commitment under the North Atlantic Treaty."

The measure, backed by the Senate Democratic Policy Committee, was first proposed nearly two years ago.

It never came to a vote, largely because of the atmosphere created by the Soviet-led invasion of Czechoslovakia in August, 1968.

Communist Proposal

BRUSSELS, Dec. 1 (UPI).—The Communist proposal for a European security conference kept the 15 members of NATO squabbling today.

Diplomatic chiefs of the permanent delegations to NATO's headquarters met twice today, as they did on Saturday and yesterday in an attempt to resolve their differences.

In the end, member nations' foreign ministers, who are meeting this week, probably will have to resolve the matter themselves.

Sen. Mundt Has Stroke

WASHINGTON, Dec. 1 (UPI).—Sen. Karl Mundt, R., S.D., 69, has suffered a "moderate-sized" stroke which has affected his right side and partly impaired his ability to speak and walk, his office said today.

Laird Sees No Change

(Continued from Page 1)

have been charged in the controversial case and 24 others are under investigation.

"I'm not pleased with a case like this," Mr. Laird said, "I am very disturbed if the allegations prove to be true."

He suggested, however, that he is limited in what he can say because it might prejudice the case from a legal standpoint.

"We in the Department of Defense—all the people in the Department of Defense—should see that the prosecution as well as the defense has all the material available to them that they need to pursue this case," Mr. Laird said.

"But we should not be a part of prejudicing the case one way or another."

Whatever the outcome of the investigation, Mr. Laird said, people should not indict the more than 1.2 million servicemen who have followed the rules of war while serving in Vietnam.

"The orders are understood, read to them, and the orders are very clear in this," Mr. Laird said, referring to mistreatment of prisoners or civilians.

Force Laboratory Probed Illegal Arms Diversions

By Bruce Galphin

WALTON BEACH, Fla., (WP).—Military and authorities are investigat- ts that the super-secret laboratory at Eglin Air se has been used to chan- at small arms from Viet- American civilian outlets. mber of guns involved in nt probe probably is only zen, but authorities are that the pattern they igating could be a wide open conduit for putting military weapons into unauthorized hands.

The Office of Special Investigations is handling the probe for the Air Force. Civilian aspects are being handled by the Internal Revenue Service and the Alcohol, Tobacco and Fire Arms Division of the Treasury Department.

The Air Force confirmed that the activities of Lt. Col. P. A. Marriott, chef assistant at the armament laboratory, are under investigation in connection with the alleged arms leakage.

No Charges Filed

The investigation is officially described as "administrative" as opposed to criminal. No charges have been filed against Col. Marriott, and he remains on active duty at the lab.

The Post learned from an unofficial Air Force source that at least three alleged gun shipments were being investigated by the OSI and Treasury agents. Col. Marriott is alleged to have been connected with only one of them.

According to the allegations, the weapons came from Vietnam, were airlifted to the armament laboratory, and then were earmarked for delivery to a company in Atlanta.

Syndicated columnist Jack Anderson, who first reported that the investigation was under way, wrote that weapons were being smuggled out of Eglin "for underground distribution to anti-Negro right-wing organizations in the South."

"No evidence has been developed to date which would indicate that Lt. Col. Marriott was selling these weapons or they were being diverted to subversive elements," the Air Force said in a two-paragraph statement which has been its only official comment on the matter. An unofficial source further confirmed the Air Force's conviction that the weapons were not destined for such right-wing groups.

Col. Marriott, a stocky career officer, has declined to comment on the investigation or the charges.

Russian Guns Involved

At least some of the weapons involved in the probe are Russian-designed AK-13 submachine guns, which are used by Communist forces in Vietnam. Many American GIs carry captured AK-13s as secondary weapons because the spray-type gun can take more punishment than the standard issue M-16.

Col. Marriott's duties have taken him intermittently to Vietnam. But one officer told The Post that one of the shipments being investigated occurred after Col. Marriott last returned to the States.

AK-13s sometimes are shipped to American training bases so that troops can be familiarized with them. "But we don't have any facility to test that kind of weapon here," an Eglin officer said.

Col. Abner Martin, commanding officer of the lab, declined to say whether small arms from Vietnam were routinely shipped into and out of the armament laboratory.

"You're pressing me for information that might deal with the investigation," he said.

"That's one of the questions the investigation will cover," an official spokesman said.

Armament Development

The armament laboratory at Eglin is a major research and development center. According to an Air Force brochure, it provides "exploratory and advanced development of non-nuclear air armament."

Some of the lab's work has top secret classification, but there has been no suggestion in the present matter that security has been compromised in that respect.

Col. Marriott's commanding officer, Col. Martin, said that Col. Marriott is "a fine worker and I have no complaints with him."

The Air Force was asked how many guns, if any, left the base; the type and number of weapons involved; the name of the Atlanta recepient and the number of incidents being investigated. The answer to each question was that it was being investigated.

Treasury spokesmen in Washington said that they had received no reports on the matter from their field agents.

Associated Press.

LISTENING TO SOLE MUSIC—They came to West Palm Beach, Fla., for rock and got rain but, nevertheless, they stayed. Here, three young men dived barefoot into a culvert to escape the torments of inclement weather.

Pre-Dawn Frenzy by Stones Closes Florida Rock Session

WEST PALM BEACH, Fla., Dec. 1 (UPI).—Britain's Rolling Stones unloaded a frenzied pre-dawn rock session on 40,000 shivering and sleepy-eyed youths today to climax the three-day Palm Beach rock festival.

The Stones began their performance at 4:30 a.m. after the final day's lineup of acts logjammed because of a two-and-half-hour strike by helicopter pilots, who had refused to ferry performers unless they were paid in advance.

Most of the youths who jammed the muddy, rain-soaked festival grounds had left by daybreak.

The Stones' performance was further delayed when station wagons packed with their equipment bogged down in the quagmire which ringed the staging area.

Dozens of stage hands shouldered the heavy electronic gear and plowed 100 yards through the mud to the stage.

The violence that some officials predicted would erupt during Florida's big rock music festival failed to materialize, but some 113 youths were arrested during the weekend, mostly on narcotics charges.

Promoter Dave Rupp said he would not reveal the net finances of the festival until he has a chance to review his bankbook.

Blues singer Janis Joplin said Saturday that she and several other performers had agreed to appear for less than usual.

But if Mr. Rupp was worried about money, it was not in evidence yesterday as he told the crowd to rip up $60,000 worth of temporary wooden toilets and bleachers for firewood.

"It's better to burn up the whole thing than to have one kid freeze," he said.

Profiteering Is Charged on AF Contracts

WASHINGTON, Dec. 1 (AP).—Profits of up to 1,403 percent were made by a California-based manufacturer in a series of 22 small Air Force contracts, according to a report by the U.S. comptroller general, made public yesterday.

The report said that on the 22 negotiated contracts awarded to the Lionel-Pacific Corp. of Anaheim, Calif., profits ranged from 12.9 percent to 1,403 percent above costs. The average profit above costs was 245 percent.

The contracts were issued by the Oklahoma City Air Material Area (OCAMA).

Lionel-Pacific, a subsidiary of the Lionel Corp., of Hillside, N.J., manufactures air valves and other aeronautical parts.

The U.S. General Accounting Office said that on two of the contracts, prices should not have exceeded $4,400 and $3,600 respectively, but Lionel-Pacific, the GAO said, realized a total of $25,063 and $22,044, or 1,025 percent and 818 percent of costs respectively.

"We believe that improvement is needed at OCAMA in procurement procedures covering small purchases, and we are currently examining into this matter," said U.S. Comptroller General Elmer B. Staats.

The report said also that two of the 22 contracts with the government resulted in a loss, but, of $88,547 involved in the contracts only $25,812 represented costs incurred, leaving a profit of $62,935.

According to the report, there have been other instances of high profit-making by manufacturers dealing with defense supply agencies. Orders have been issued to correct the situation, it said.

Heavy Rains Flood Homes In South Italy

Airport Crews, Civil Servants Quit Work

ROME, Dec. 1 (UPI).—Storms and strikes made life difficult for millions of Italians today and threatened to continue doing so all week.

Rain fell from the Po Valley to Sicily, increasing in intensity as it moved south. Cloudbursts caused flooding at Syracuse and Trapani, Sicily, and in the Naples region.

Hundreds of persons took refuge in schools in the Naples suburb of Cardito, driven from their homes by heavy rains and the overflow of a regional sewage reservoir. The polluted water seeped into caves deep underground, threatening the foundations of many homes.

A strike by employees of a private firm that provides most ground services, including buses from plane to airport, went into its second day at Rome's Fiumicino international airport.

Employees of the various airlines carried out repairs and refueling but passengers had to hike to the administration building in the rain carrying their bags. Automobiles were used to transport babies and small children.

Treasury employees began a series of one to three-day strikes which will take various categories of workers off the job from today through Dec. 13. They are protesting a proposed new job grading and pay scale.

Schoolteachers without contracts began a two-day strike. College teachers without contracts were to strike Wednesday and some art and high school teachers and non-teaching personnel called a strike for Dec. 9 and 10.

Anesthetists and some doctors will stage sporadic strikes from tomorrow through Dec. 20. Bank clerks will strike Thursday and Friday and a railroad administrators' union has authorized a 15-day strike at an unspecified date. Administrators want the state railway agency reorganized and decentralized.

Railway station workers scheduled two 48-hour strikes during the holiday season when hundreds of thousands of Italians working elsewhere in Europe come home by train. Each strike will start and end at 9 p.m. One will be from Dec. 21 to Dec. 23, the other from Jan. 2 to Jan. 4.

Meanwhile, a Rome court sentenced the editor of an extreme left-wing publication to 17 months in jail today for justifying and inciting labor violence.

Francesco Tolin, 40, a philosophy teacher who doubles as editor of Potere Operaio (Workers Power), was found guilty of inciting crimes in four articles, one of them entitled "Yes, to Worker Violence."

Johnson Ordered Secret Service To Protect Edward Kennedy

NEW YORK, Dec. 1 (Reuters).—Lyndon Johnson ordered the Secret Service to protect Sen. Edward Kennedy after Sen. Robert Kennedy's assassination, the brother of the former President said today.

Writing in the current issue of Look magazine, Sam Houston Johnson described the events following his own arrival at the White House, where he was driven immediately after the shooting in June, 1968.

"There were no lights on in the family quarters . . . (Lyndon) had gone to bed an hour before it happened. When he was finally awakened, he stared at me with total disbelief in his eyes.

" 'Oh, my God,' he said. 'Not again. Don't tell me it's happened all over again.' "

During the next few hours "Lyndon stood in the center of all the frenzied activity, his mouth set tight, his eyes clouded with concern," wrote his brother, adding that the President had addressed an aide:

"We've got to protect Ted Kennedy. That family seems to be cursed. This may be a plot or just another madman like Oswald, but I'm not taking any chances. I want the Secret Service to provide protection for every candidate—including Teddy Kennedy."

Reminded that Sen. Kennedy was not a candidate, the President replied, according to his brother, "That doesn't make any difference. I want him protected anyway."

" 'The laws may not permit it, Mr. President,' the aide said. 'They're pretty specific about such—' "

Johnson's reply, as quoted by his brother, was: "I don't care what the law says! I'm going to have him protected if I have to issue a special executive order to do it. So you call the Secret Service right away."

Sam Johnson remarked that "as usually happens in such cases," the President "got his way without any undue fuss from the legal people."

De Gaulle Passes His Days 'Writing and Thinking of Death'

PARIS, Dec. 1 (AP).—Charles de Gaulle passes his days writing and thinking of death, a man who professes to know him well says.

The 79-year-old general "prepares for death like a man who, more than anyone else, has not stopped thinking of it for several years," Raymond Tournoux writes in the current issue of the magazine Paris-Match.

"He has seen to everything: (there will be) no big monument. He has rejected a grandiose funeral à la Churchill. He'll be buried at Colombey, very simply. 'There won't be any big show for De Gaulle,' he has said."

Mr. Tournoux, without saying he has visited with the general, described his life in retirement at Colombey-les-Deux-Eglises in detail.

In the morning he listens to the radio at 8 a.m., then writes "almost with rage." Mr. Tournoux says Gen. de Gaulle's daughter has received for typing his manuscripts for the first volume of "Memoirs of Peace," which will come out in a year.

Writing includes a vast correspondence, with from 500 to 700 letters received a week. Mr. Tournoux says Gen. de Gaulle has sent three letters "of vivid historical interest" to Pierre Messmer, his former Defense Minister.

Leisure comes in walks in the garden of his big house in Colombey and in drives in his black chauffeur-driven car.

Gen. de Gaulle has made at least two unpublicized trips, one to Le Havre and another near Orléans, Mr. Tournoux reports. On Armistice Day, Nov. 11, while visiting old battle sites, the general picnicked on cold chicken outside his car rather than eat in a restaurant.

Gen. de Gaulle, according to Mr. Tournoux, often comments on current events by saying "You see it hasn't changed. I was right," or "The situation changed in relation to what I said, but at bottom that changes nothing."

3 Scotland Yard Detectives Charged

London Policeman Resigns In Wake of Bribery Reports

LONDON, Dec. 1 (UPI).—A London policeman has resigned following reports of alleged bribery and corruption in Scotland Yard, a Yard spokesman said today.

The unidentified policeman had been accused by a motorist of offering to "forget" a breathalyzer test for a cash payment, the spokesman said. British police administer breathalyzer tests to check for drunken driving.

Meanwhile, Sir John Waldron, commisioner of London's Metropolitan Police force, studied separate reports today of irregularities in the force which followed allegations last week against two Yard detectives and a provincial detective. The charges were first disclosed in an article in the Times of London Saturday.

The Times had earlier submitted tape recordings and documents to police officials which contained alleged evidence that the three detectives had accepted payments to protect criminals.

Detective to Sue Times

The Scotland Yard detectives were identified by the Times as Detective-Inspector Bernard Robson and Detective-Sgt. Gordon Harris. The provincial officer was identified as Detective-Sgt. John Symonds.

Detective-Sgt. Symonds, the only officer to publicly acknowledge the charges, said yesterday he was innocent and intended to file a lawsuit against the Times.

A Scotland Yard official said that if the police commissioner decides a preliminary investigation has substantiated the charges, the case will be handed over to the public prosecutor for trial.

The three officers remained on duty today while officials studied reports of a preliminary probe.

Cleaver Reportedly Reneged On Pledge to Denounce Cuba

PARIS, Dec. 1 (UPI).—A former aide to Eldridge Cleaver says the Black Panther party official reneged on a promise to denounce Fidel Castro's government as racist following his departure from Cuba.

Andrew Ferrell, 29, who has been branded a "traitor" to the Panther cause in a pamphlet circulated in Europe, made the statement yesterday in an interview.

"The Cubans were faking on the world, especially on the revolutionaries and progressive people in the States, to keep their international support strong," Ferrell said.

"Cleaver began to see it like it really was—how deeply ingrained this racist character is in the Cuban power structure."

Ferrell, a native of Beaumont, Texas, who is wanted by authorities in California and Colorado, said he and Cleaver decided to leave Cuba after discovering it was not really what they had expected it to be.

"We had agreed prior to leaving Cuba that once we were out, we were going to make an announcement denouncing the Cubans," he said. "But for some reason, Eldridge reneged on that agreement."

Met in Prison

Ferrell said he met Cleaver in a California prison in 1967 and decided to jump parole in mid-1968 to go to Cuba, where Cleaver later joined him. There, he became Panther deputy information minister under Cleaver, the party's information minister.

He said the Cubans put him and a friend into solitary confinement for eight weeks, an experience he described as "mental torture, worse than anything I'd seen in the United States."

Later they were given jobs as laborers in Camagusy Province.

"We ran into all kinds of dissatisfied Cubans," Ferrell said. "You know, like people were saying, 'Hey, man, you're crazy. What did you come down here for? Everybody's leaving here and going there (America). This is insane.' "

He said he doubted these people at first but encountered more and more of them. To appease his unhappiness, the Castro government gave him an apartment in Havana and offered him a girl.

Red-Carpet Treatment

Then Cleaver arrived. Ferrell said at first Cleaver, given the red-carpet treatment by Mr. Castro, was uncritical, but after a few months saw how conditions really were.

He quoted Cleaver as telling Castro aide Jesus Jiminez, "You're treating them (Cuba's blacks) like the Nazis treated the Jews in Germany. The only thing you're not doing is putting them in gas chambers. You're working them to death."

Ferrell said the Castro regime vainly tried to silence Cleaver's concern and eventually offered to fly them out of the country. He said he and Cleaver accepted the offer and flew separately to Algiers.

It was Cleaver's refusal to make public their discoveries about Cuba which contributed to his decision to quit the party, Ferrell said. He said he planned to turn himself over to U.S. Embassy officials in Paris within two weeks.

2-Week Strike By Teachers Starts in U.K.

150,000 Pupils Idled By Wage Dispute

By Alvin Shuster

LONDON, Dec. 1 (NYT).—A two-week strike began today at more than 325 schools in Britain in a widespread effort by teachers to obtain higher pay.

More than 150,000 children—primarily in London, Wales, Manchester, Birmingham and Bristol—remained at home. Working mothers left their jobs to care for them or paid neighbors to look after them. Some ad hoc schoolrooms were set up by clergymen.

About 4,500 teachers, members of the National Union of Teachers, walked out of the primary and secondary schools in support of their demand for an additional $324 a year. If this does not work, union leaders said, they would bring more out after Christmas.

"Teachers feel quite strongly about the welfare of their children," said Edward Britton, the general secretary of the union, "but we have been drawn into this by the attitude of the government and local authorities."

Others Got Raise

The teachers had agreed earlier this year to a pay increase of 7 percent over two years, raising their basic pay scale to $2,064 for the first year of service, to $3,340 after 14 years. Larger pay increases granted later to pilots, trashmen, firemen and others inspired the teachers to adopt a position of militancy of their own.

After rejecting an offer of $120 a year more, the teachers' union called thousands out last week to march in protest in a one-day strike. Word circulated today that the local education authorities, who negotiate with the teachers through a central committee, were preparing to offer about $200 more a year when the current strike is over.

Asked if they would accept that reported offer at a meeting in the headquarters of the union here today, London teachers shouted "No." Mr. Britton, whose union represents about 225,000 of the 300,000 teachers in England and Wales, told the teachers to "be of good courage."

In response to the teachers' claims, a spokesman for the local education authorities said today that only 13 percent of the teachers earn less than $2,400 a year. Sir William Alexander, secretary of the Associations of Education Committees, said that more than 55 percent of all teachers earn over $3,600 a year.

The teachers' union said that those on strike would continue to receive their pay with the cost, estimated at more than $600,000, coming from a special union fund.

* Why do American girls crave a hundred minutes in Orly?

Because, even when they're flying to Timbuctoo, *les américaines,* when they're savvy, know that Orly is a pretty girl's best friend.
One hundred minutes give you just the time for a quick whiff of the magical Paris air, and a long loving look at all the little luxuries of life for which Orly has become so terribly celebrated.

Qu'est-ce qui vous ferait plaisir ? A slim little alligator wallet for him... or a tankful of Shalimar for you? The prettiest Lanvin scarf, the latest German camera, an oval Swiss watch? You'll find these and many other treasures in Orly's dazzling boutiques* at equally dazzling tax-free, customs-free prices.

And after all that, there's still time, plenty of time, for a peaceful glass of champagne... just one of the things which make Orly one of the most endearing places to spend a hundred perfect minutes...one more little surprise... a car-rental service (without chauffer)

Occupation Problems

The Israelis are reported to be increasingly concerned over the problems of administering the territories they have occupied since the June war. Sabotage and terror, the twin weapons of the occupied community, are not easy to cope with, especially when both can be imported over the border from bases in enemy lands. The escalation of reprisals, the movement toward establishing collective responsibility, both bring the region closer to those horrors which Lidice, Hué and Pinkville represent.

The occupation policy was sound in theory and by many precedents. Israel held on to what she had seized in the June war to force the kind of settlement the Arab states have consistently refused, and to include in that settlement some rectification of borders that were admittedly absurd. Israel was strengthened in this resolve by the aftermath of the Suez crisis, when the speedy evacuation of occupied lands in obedience to a UN order resulted only in continued tensions, embargo and an eventual fresh crisis. So the Israelis refused to accept the Security Council order to evacuate captured terrain as a pre-condition to any new attempt at settlement.

The difficulty, however, was not only that this gave the Arabs the sanction of international law. It also gave Israel an indigestible new population of Arabs, a guerrilla battleground that favors the fedayeen and has fired Arab nationalism to new heat. Given the facts that while Arab armies have been defeated, their nations have not; that the Soviet Union—however willing to see a peaceful resolution of the conflict—still backs the Arabs strictly on the lines of the Security Council's decision, and that Israel is especially sensitive to charges of imposing a Nazi-type occupation, the border lands have become a source of weakness, rather than of strength to Israel.

The dilemma is hard to resolve. Israel's claim to an assured nationhood is legitimate—and it is that claim which the Arabs now openly contest. The big powers are agreed upon Israel's basic contention but differ on the timing and extent of an Israeli withdrawal. Yet to Israel that must seem the crux of the matter: the retention or surrender of the only substantial counter for bargaining in its hands.

Meanwhile, terror mounts and spreads, the great powers seem helpless and authority, in the Arab states, is shifting from government to the terrorists. Reason still dictates a settlement that will give assurances to Israel, justice for the Arabs in the path of war, and responsible government and the search for a better way of life for the Arab millions generally. But reason's voice is thin and weak amid the clamor of mutual fears and hatreds.

It Can Be Done

As if to prove that knotty boundary problems can be solved by the application of a little good sense and goodwill, Italy and Austria have reached accord on the status of the predominantly German-speaking Alto Adige. One of the legacies which a tangled history had bequeathed to modern states, Alto Adige presented the usual mixture of concrete grievances and nationalism per se. It almost prevented the "Pact of Steel" between Adolf Hitler and Benito Mussolini—an incidental benefit which might have justified the existence of the problem—and has poisoned relations between Italy and post-Hitlerian Austria.

No one can assert with any confidence that it was merely common sense that won the day in the Alto Adige (henceforth South Tyrol). Italy had economic pressures on its side, thanks to membership in the Common Market, which Austria would like to join. But just as Tito's isolation from Moscow provided the occasion, and the incentive, for a reasonable answer to the even nastier question of Trieste, so the South Tyrolese solution may be no weaker for the mixed motives that brought it about.

No one can, of course, guarantee that the solution will really work. The points where nationalisms meet, and abrade one another, can always be sources of discontent. But those age-old foes, Italy and Austria, do have a common interest now in maintaining good relations—an interest that transcends old battle cries and old boundary squabbles. With a modicum of care, the issue of South Tyrol can be relegated to history's dustbin.

The agreement on Alto Adige has its relevance for other boundary disputes—along the Siberian-Chinese border, for example, or in the Middle East. But the analogy is not wholly hopeful. Behind such a settlement must be a general attitude of goodwill, and a general realization that no boundary can be fixed in rational or even legalistic terms without an overriding disposition to reach agreement rather than sustain a cause.

Boundaries, unless they involve really massive territories or flick nationalism on the unbearable raw (Alsace-Lorraine, for example, or Kashmir), are seldom the source of international hostility—they are, rather, its symptoms. South Tyrol illustrates the need of prevailing good intentions quite as much as the need for practical sense in working out details. But since every government protests its desire for peace—providing it gets what it wants—the example of the Austro-Italian negotiations may serve as a good example to those states capable of profiting by one.

International Opinion

The Pinkville Massacre

Only an independent inquiry . . . can cover all the relevant aspects. Questions ought to be answered all the way from the Defense Department at the top to the infantryman on the ground. To restrict investigation to court-martial proceedings alone is dangerous. It will give the impression that platoon commanders and others of low rank, however criminal their acts, are being made the scapegoats for savage events over which more senior officers ought to share the blame. It will also tend to give the impression that what happened at Pinkville has probably happened in two dozen other places but so far has been successfully hushed up.

—From the Guardian (London).

* * *

The alleged massacre of Vietnamese villagers at My Lai puts in question the U.S. war policy in Vietnam as well as the "American conscience" and "American democracy." We feel the incident occurred as a logical consequence of the nature of the Vietnam war and the strategy taken by the U.S. forces in Vietnam.

The tragedy comes from the U.S. search and destroy strategy, which calls for locating enemy main units and have them destroyed by the U.S. forces. It is hard to distinguish between main or supporting units or guerrillas. It is also hard to tell combatants from noncombatants. In the eyes of American troops, all places and Vietnamese look hostile. Heavy casualties have been reported among noncombatants in this war.

Nine out of every ten people hospitalized for treatment of war-inflicted wounds are said to be noncombatants, especially children below 12. The United States cannot heal wounds inflicted by the My Lai incident on its conscience except by bringing the war to a quick end.

—From Asahi Shimbun (Tokyo).

* * *

There is a treason worse than criticism of governments. It is the treason that betrays the values for which one's country stands. To expose a massacre in Vietnam, it is said, is disloyal to the United States. The people who believe this are not all cranks. Somehow they have been brought to suppose that a report of American atrocity, however true and however appalling, is evidence of anti-Americanism. This itself testifies to a shattering misconception. For the surrender of loyalty is theirs, not ours; and the loyalty in question is to the principles for which the Vietnam war is allegedly being fought.

—From the Sunday Times (London).

Mideast Talks Resume

Resumption of the four-power talks on the Middle East does not serve the purpose, originally hoped for, of building upon a foundation laid by the two superpowers. In view of the failure of the latter to reach even a modicum of agreement, the latest multilateral round would seem to be a desperate attempt to exhaust the last possibilities of finding a way out of a labyrinth which seems to grow progressively more hopeless.

Indications from French and British circles are that the two lesser powers will try, in this new round of discussions, to ease the situation by achieving pragmatic solutions of specific problems rather than continuing to search for an obviously chimerical magic formula for the settlement of the entire conflict.

—From Neue Zuercher Zeitung (Zurich).

In the International Edition

Seventy-Five Years Ago

Dec. 2, 1894

NEW YORK—As the war between China and Japan proceeds we see that China is like the South when Sherman marched through it—an empty eggshell. The conflict is no longer a war—it is a rout. When the inevitable end comes, what part is the United States to play in the division of China? Japan has a claim; Russia, England and France have claims, but are we to have nothing to say about the future of China? This seems to be the clamlike policy of the United States government.

Fifty Years Ago

Dec. 2, 1919

NEW YORK—Henry Clay Frick, pioneer ironmaster and one of the foremost art collectors in the United States, died suddenly at his Fifth Ave. home here early today in his seventieth year. Once the associate of Andrew Carnegie and then his stern business enemy, this master of finance, who from a farmhand rose in the world to become a possessor of a fortune estimated at $200,000,0000, died in peace. A large part of the "steel king's" fortune will probably be left to the public.

Disarming the Armorers

By Joseph Kraft

WASHINGTON.—The powers of light have to take on the powers of darkness whenever disarmament is at stake. And the latest arms control moves are important chiefly in the context of the continuing struggle between good guys and bad.

By themselves the renunciation of germ warfare by this country and the ratification of the Non-Proliferation Treaty in Washington and Moscow are not a big deal. But they reflect a dip in the influence of the bad guys in Washington and the Atlantic alliance. And that loss of clout augurs fair for what is a very big deal indeed—the Strategic Arms Limitation Talks now going on in Helsinki with the Soviet Union.

The reasons behind the continuing fights over arms control are not trivial. There are real honest-to-goodness security problems in the modern world. Highly organized corps of military men are responsible for looking after the security of their countries. And some countries are rather more exposed than others.

Resistance Centers

When it becomes a question of curtailing available weapons, the professional military men inevitably raise questions—particularly in the most exposed countries. So automatic is this response, that it has become possible to identify two chief stoppers to disarmament proposals on the Western side of the fence. In this country, there are the professional military men, heading up in the Joint Chiefs of Staff. In the alliance, there are the West Germans. By no mere chance, the developments last week involved a change of outlook in both these traditional centers of resistance to arms control.

Renunciation of germ warfare by this country is something that has long been sought by officials interested in arms control. Not that there was any serious chance that the United States would initiate the use of chemical or biological weapons. But it was felt that formal renunciation would build confidence and give a general lift to other efforts for arms control.

In the latter years of the Johnson administration, civilian officials of the Pentagon actually pushed a proposal to renounce germ warfare up to the White House. But the Joint Chiefs objected on the ground that renunciation might limit the use of tear gas and defoliants in Vietnam. Mr. Johnson, keen to have military support for his waging of the Vietnam war, did not press the issue.

When the Nixon administration came to power, a new study of germ warfare was instituted by the civilian authorities in the Pentagon. Like their predecessors they came to the conclusion that arms control would be advanced by renunciation. The Joint Chiefs objected once again, on the same grounds as before. But Mr. Nixon is not so beholden to the military—or at least not yet. He made a temporary exception for defoliants and tear gas, and pushed through with renunciation.

The NPT

The Non-Proliferation Treaty to prevent the spread of nuclear weapons is a similar case. The Russians were interested in the treaty to put a formal stopper on any move to make West Germany a nuclear power. The United States, having no intention to make West Germany nuclear anyway, was prepared to oblige Moscow, chiefly in hope that NPT would lead to further progress in arms control.

Many non-nuclear powers opposed the treaty on the grounds that it relegated them permanently to second-class status. And this feeling was especially keen in West Germany—particularly when power in Bonn was held by a Christian Democratic government claiming special concern for German national interests. Accordingly NPT was delayed for years by legalistic objections thrown up against the treaty by Christian Democratic officials.

But as a result of the general election last September, the Christian Democrats were replaced by a Social Democratic regime under Willy Brandt. Shortly after becoming chancellor last month, Brandt sent a mission to Washington to clear away obstacles to NPT. With the West Germans on board, the United States and Russia went ahead and ratified the treaty.

Both on non-proliferation and renunciation of germ warfare, in other words, progress was possible mainly because of changes diminishing the veto power of the traditional opponents of arms control—the American military and the West German politicos. These changes are not just for today. The Vietnam debacle has lowered the military influence in this country—the more so as a Republican President tends to be less vulnerable to pressure from the brass than a Democratic President. The Social Democrats look to be in office for some time.

If they succeed, the Soviet-American talks now under way in Helsinki will doubtless generate proposals offensive to the traditional sources of opposition to arms control. But the influence of these nay-sayers is bound to be at a discount. So if the American and Soviet negotiators can strike a bargain, the outlook for a genuine reduction of armaments is probably better than it has ever been.

Of Mice and Men

By Anthony Lewis

LONDON.—When an enterprising tabloid discovered the other day that the queen's ceremonial horses were being sold off in old age to provide steaks for Continental horsemeat fanciers, there was an almost audible national gasp. The usually stubborn men of Whitehall took only a day to change their policy and stop the slaughter.

It is true that English insularity may have figured in the shocked reaction. The idea of depraved Belgians and Frenchmen dining on veterans of Trooping the Colour was especially unacceptable. But no doubt the basic emotion was love of animals.

What is it about the British and animals?

Anthony Grey, the Reuters correspondent held under house arrest in Peking for years, told on his return here of how the Chinese had killed his cat. Instantly there were letters to the papers offering donations to animal societies in the cat's honor. When someone wrote to suggest that sympathy for human victims of Chinese cruelty might be more appropriate, he was dismissed by others as eccentric.

Nor was the episode of the queen's horses the first of its kind. A few years ago the British learned that Irish ponies were being shipped to the Continent for slaughter. The outcry was so great that the Irish Republic's prime minister came to London to reassure horse-lovers that he would spare the ponies.

The Earl of Snowdon, the photographer who married Princess Margaret, had a television program recently about the English and their pets. He showed, among other oddities, a woman who said to her parrot:

"Yes, we're very close to each other, aren't we, Prudie? I even take you to bed with me sometimes when it's cold. And you say, sometimes, 'Oh it's cold, Ma.' You do, don't you? Yes, darling, you do."

Animal worship is an old subject of English music-hall jokes, but it is not altogether a comic phenomenon. There certainly can be a morbid quality in such emotive displays of affection.

One theory is that in expressing their emotion toward dogs and parrots and horses the English are letting go what they so often suppress in human relationships. That is, they come right out and admit they have feelings.

The old impression of the English as a cold, aloof people has been pretty well dissipated. Most American tourists have stories to tell about the exceptional kindness they encounter here. But there still is something. The British upper classes can be the most controlled people in the world. They are brilliant talkers—but not about what is inside them. The American, wearing his feelings on his sleeve, wonders: What do they do with their emotions?

Desmond Morris, author of that brilliant zoological account of man, "The Naked Ape," cautions against any quick theorizing on the attitudes of different cultures toward animals. It is a complicated subject, he says, and so fascinating that he wants to study it at length and perhaps write a book.

For example, the English were not always so soft-hearted. In the time of the first Elizabeth they tortured animals for entertainment. That was bear-baiting. We treat animals as human symbols, and the English civilization has become less brutal to them as to men in the last four centuries.

In the Western world, predominantly Roman Catholic countries such as France, Ireland and Italy seem to be relatively unsentimental about animals. Perhaps the symbolism is less important among people with an assured view of man's place in the natural order.

Some may find it confusing that England, a country now so tender to horses, has a notorious problem of child-beating. Again, polls indicate that an overwhelming majority of those newspaper readers upset by the death of horses wants to bring back capital punishment for human beings.

But, of course, horses do not commit crimes. Animals symbolize not humanity in general but humanity without guilt. They are not personalities who worry or intimidate us, but faithful servants. They do not talk back or raise all the difficult human questions of character and motivation.

In a book called "Fetishism" published last year, Kathleen Szasz found "something frightening in the speed with which the cult of pet animals has gained ground throughout the Western world . . . it seems as if, by anthropomorphizing the animals he takes into his home and gradually replacing his human contacts with animals, man were trying to escape into an other-than-human community, a community he can control and which, therefore, does not threaten his very existence."

Some relationships between man and pet animal today are worryingly strange. But the alternative for some people may be no communication at all—a dangerous turning in on themselves. To attack the pet phenomenon is to attack the symptom of alienatio in modern society, not the causes.

Letters

The Reported Massacre in Vietna

The letter from Kate McCorquodale on Song My (Nov. 29) places the argument on its rightful plane, above nationality and "isms," on the level of man's bond to man and to humanity as a whole. These are relationships as yet unresolved at our present stage of civilization, or lack of it. In this nuclear time we are faced with resolving them or courting annihilation.

By contrast to this moving, measured letter, the one that follows stands revealed in its crudity and indifference to the human condition. Mr. Lipson invokes "Americanism" but his words sell out the American traditions of humanism and democracy for the empty symbols of flags and slogans. He is full of contradictions, saying "I don't know the facts, neither do you . . ." and then categorically affirming that Song My was "an operational necessity." Nazi and Soviet propaganda have used the phrase to describe actions subsequently condemned by free men as atrocities.

No doubt it is "mawkish" and "liberal" to regret this massacre. As it is to regret Auschwitz and the eleven million dead of the World War II camps. Or was it only ten million?

Mr. Lipson goes on to deplore the persecution of "heroic young men." Surely this is a new type of hero for America to admire. How square it makes one feel still to respect Washington and Lincoln as heroic and humanitarian American prototypes. Mr. Lipson is right. One must move with the times. On with the futile and self-destroying war. Shoulder to shoulder with the "heroes" of Mr. Lipson's praetorian guard we shall march forward to moral suicide.

THOMAS R. BRANSTEN.
Geneva.

* * *

Let's hope the U.S. authorities follow through with their prosecution and punishment of the Nazi-style "Pinkville" murderers.

There is no earthly excuse for murdering women and little children. The only hopeful aspect now: for once at least, a government at war denounces its "own" murderers.

P. M. MAYER.
Auribeau, France.

* * *

The American soul was already irremediably tarnished by the time the soul watchers started streaming into America from Europe. In 1778 the Iroquois Indians massacred the inhabitants of Cherry Valley, N.Y.

Gen. Sullivan, a famous Anglo-Saxon, led in revenge a band of squirrel hunters to an Iroquois village. His orders to them made the orders at Pinkville seem like an invitation to a Junior League Ball.

One revealing anecdote tells of Sullivan holding an Indian baby by one foot with his saber drawn back. A soldier rushed up, like a journalist, crying: "Oh general, not a baby!" As the sword descended on the baby, the general replied tartly: "Nits make lice."

F. A. G. CROOKE.
Paris.

* * *

In the general orders of an American soldier it states that you must obey all *lawful* orders given by your superiors. In the case of Song My, or Pinkville, the soldiers are saying that they were ordered to do the shooting of the large number of civilians killed there.

Murder is not a lawful order according to military regulations; therefore, everyone who pulled a trigger at Song My is just as guilty as the one who ordered it and they all should be given the same punishment.

PERRY J. BROOKS, jr.
Copenhagen.

* * *

We the U.S. public . . . are manipulated into believing that our wars are righteous wars. We maintain a naïve belief that some murders are heroic and others criminal. How long can we endure this insanity?

JOHN A. LEMMON, jr.
Colchester, England.

* * *

Why this outcry of the world press because several hundred civilians were killed in a Vietnamese village?

In a totally amoral affair such as war, morality and a code of law cannot be applied.

There is no such thing crime.

War is the crime.

ARTHUR M

The Bateau Lavoir, when Picasso lived there.

ntmartre 'Bateau Lavoir,' asso's Atelier, Is Sold

By John Vmocur

Dec. 1 (AP).—The builde Pablo Picasso first modern art his Cubist vi sold at auction to an private party today after s who still work there abandoned plans to bid to save their own studios.

They said Picasso had failed to intervene in their favor.

The "Bateau Lavoir," a strange shiplike building in Montmartre, went for 800,000 francs ($144,000) to Georges Desclozeaux, a lawyer who refused to say whom he was representing.

The bidding for the "Bateau Lavoir" (laundry ship) was followed closely by representatives of the city of Paris, who have ten days in which they may outbid the private party and win back the building.

The private interests were thought to be art dealers who want to set up galleries in the building. The city of Paris is understood to be considering making a museum out of it.

In either case, the ten artists who still work in the wooden-walled studios of Picasso, Rousseau and Van Dongen face eviction.

They did not bid because the auction was arranged so that a single party could take all 64 individual units in the building with one bid.

"We figure we're better off with the city getting it than some people," said Armand Lourenco, a painter. "In either case, the big guys will eat the little guys."

Mr. Lourenco, who works in Van Dongen's old studio, said he had written to Picasso, now 88, asking him to intervene "in favor of living artists," not with money, "but by "saying something to the press about leaving us our ateliers. We're sure it would have helped."

"But I suppose he doesn't give a damn now," Mr. Lourenco added. "When you're big you get to be a monster and you devour yourself."

Picasso lived in the building from 1900 to 1904. He has told about the life there and the stream of friends who came to drink, sleep and talk: painters Matisse, Braque, Modigliani, Utrillo and poets Apollinaire and Cocteau.

Arab Envoys Get Protests Over Grenade Raid in Athens

ATHENS, Dec. 1 (Reuters).—Greece made a formal protest today to the seven Arab envoys here over last Thursday's bomb attack on an Israeli airline office—in which a two-and-a-half-year-old boy was killed—and banned the entry of all Palestinians carrying provisional travel documents.

The steps were announced as two Jordanians appeared before an investigating magistrate, accused of throwing a grenade into El Al's office in the center of Athens. The boy, one of 15 injured in the attack, died in a hospital here Saturday.

Foreign Minister Panayotis Pipinelis summoned the ambassadors of Egypt, Syria, Iraq, Lebanon, Sudan and Saudi Arabia as well as the Libyan chargé d'affaires.

An official statement by the Foreign Ministry said Mr. Pipinelis expressed to them "the anxiety and displeasure of the Greek people and government following the recent terrorist activities by Arab extremists which resulted in so many victims, including the death of an innocent child."

Certain Measures

"Mr. Pipinelis told the ambassadors of certain measures the Greek government has been obliged to take to protect public order and safety, and he informed them that the entry into Greece of Palestinians carrying provisional travel documents has been banned."

The official statement concluded: "Finally, Mr. Pipinelis asked the Arab ambassadors to exert their influence on their governments, and through them on the commando organizations, to avoid a repetition of such acts of violence since they could have only adverse political repercussions."

The two Jordanians appeared before a magistrate today to answer four charges, including one of willful manslaughter. They were given 24 hours to prepare their defense.

The two men, Elias Dergarabelian, 23, and Mansour Saiffedin Murad Zugache, 21, both from Amman, have already admitted they belonged to a Jordanian commando organization based in Amman.

But they denied any intent to kill or injure anyone, according to the police.

There is no murder charge, as such, in Greece. Willful manslaughter, which can carry the death penalty, is the equivalent.

Al Ahram Criticizes Attack

CAIRO, Dec. 1 (Reuters).—The authoritative Cairo newspaper Al Ahram today published an article criticizing the Arab commando attack in Athens.

The Al Ahram article said nobody could question the right of Palestinian commando organizations to confront Israel anywhere.

But, he added, when the victims were among the people of a nation which was not directly responsible for the plight of Palestinians, then the reaction would be against Palestinian resistance.

McNamara a Trustee

PASADENA, Calif., Dec. 1 (UPI).—Former U.S. Defense Secretary Robert S. McNamara has been elected to the board of trustees of the California Institute of Technology, it was announced yesterday.

Changing-of-Guard as Usual At Prison Without a Prisoner

BERLIN, Dec. 1 (UPI).—A U.S. Army guard detail relieved the Russians at the Spandau war-crimes prison today to guard a prisoner who wasn't even there, a situation described by a Western official as "Alice in Blunderland."

The only prisoner in Spandau, Nazi deputy fuehrer Rudolf Hess, was transferred on Nov. 24 from the prison to the nearby British military hospital for treatment of a bleeding stomach ulcer.

Hess's condition was described today as "satisfactory." There was no specific information as to how long he would be hospitalized ("quite a time yet," said a hospital spokesman), nor whether an operation was scheduled.

Despite Hess's absence, however, the changing-of-the-guard ceremony took place as usual on the first of the month. The Americans took over the four-power rotating chairmanship and the guard of the prison as they have every Dec. 1 for the last 22 years.

Western officials who wish to grant Hess an amnesty, something the Russians have opposed in the past, said the ceremony today showed the absurdity of the whole prison situation.

"It is absurd enough to have a platoon of soldiers and a complete prison administration to guard one man in a prison built for 660 inmates," one official said. "It is insane when that prisoner isn't even there."

In addition to the platoon of soldiers, the prison has four wardens, one from each nation, 20 civilian Western allied guards and a staff of 17 administrators, all of which costs the West Berlin city government $217,983 a year.

Israel Sees Raids as War Deterrent

TEL AVIV, Dec. 1 (UPI).—A senior Israeli military officer said today that frequent Israeli air strikes against Egyptian positions along the Suez Canal have two purposes:

- Punishment of the Egyptians' violations of the cease-fire to convince them that attacks on Israeli invite retaliation.
- To remind Egyptians that Israeli control of the air precludes any chance that an all-out Egyptian attack could succeed.

"In this sense, our air raids are a deterrent to their starting a war," the officer told a news briefing.

Earlier today Israeli Air Force jets streaked into Jordan just south of the Sea of Galilee to silence Arabs who opened small-arms fire on an Israeli Army patrol inside Israel, a military spokesman announced.

Israeli warplanes also struck "Egyptian military objectives" for about ten minutes in the southern sector of the Suez Canal, he said.

The senior military officer told the later news briefing that last week's air strikes against Arab artillery in northern Jordan virtually stilled military shelling from the region, just as strikes against southern Jordanian emplacements the week before silenced that region.

Hedged Pledge on Okinawa Opens Sato's Diet Campaign

By Selig S. Harrison

TOKYO, Dec. 1 (WP).—Premier Eisaku Sato kicked off Japan's national election campaign today with a firm pledge that the United States would remove nuclear weapons before returning Okinawa to Japan and a more guarded assurance that Japan would keep nuclear arms permanently out of the island following its reversion.

Mr. Sato made a formal report on his recent Washington talks with President Nixon in an address opening a two-day special session of the Diet (parliament). Opposition leaders will be given time for speeches tomorrow but will not be able to cross-examine Mr. Sato in the brief plenary session preceding formal dissolution of the lower house.

The governing Liberal Democratic party (LDP) is seeking a fresh mandate on Dec. 27 in the first lower-house elections since January, 1967. Upper-chamber deputies are chosen for six-year terms at staggered three-year intervals and will not be up for election this year.

Opposition spokesmen charged today that Mr. Sato must have something to hide or he would not have "rigged" a lightning session with no time for questioning on his Washington talks. They point out that the election has been scheduled during the busy year-end holiday season for the first time in Japanese parliamentary history as evidence that the LDP hopes to benefit from a low voter turnout.

LDP leaders respond that there will be plenty of time for discussion on Okinawa and security issues in the regular January Diet session after the election. Mr. Sato will tell the voters frankly that he plans to extend the Japan-U.S. security treaty following expiration of the current ten-year treaty term next June 23, his supporters say.

In his report today, Mr. Sato declared that the security treaty would be applied to Okinawa "in exactly the same way as in the homeland, without any modification thereof." This can be interpreted in one way by the Japanese public and in quite another way by U.S. officials.

Most casual Japanese television viewers were likely to get the impression that Mr. Sato was reaffirming his intention to extend the same ban on nuclear weapons now applying in the home islands to Okinawa. But strictly speaking, as opposition leaders point out, he simply said that Okinawa and the home islands will be governed by the same requirement for "prior consultation" with Japan if the United States ever seeks to introduce nuclear weapons. He did not categorically rule out the reintroduction of nuclear weapons under all circumstances.

The joint communiqué issued by Mr. Sato and Mr. Nixon following their Washington talks ten days ago indicated that the United States would remove nuclear weapons from the island prior to reversion, but that this would be "without prejudice" to the U.S. treaty right to seek Japanese approval for their reintroduction through the "prior consultation" machinery.

Russia Clarifies View on U.S. Role At Security Talks

MOSCOW, Dec. 1 (AP).—Denmark has agreed that a European security conference, as proposed by the Warsaw Pact countries, would help ease tensions and promote cooperation, Tass reported today.

The Soviet news agency, summarizing a Danish-Soviet communiqué on the visit to Moscow by Danish Foreign Minister Poul Hartling, also indicated that the Soviet Union had agreed to early inclusion of the United States and Canada in the conference.

The Tass report said the two countries agreed that the conference should be "properly prepared and that all interested countries participate in it from the very beginning."

The U.S. position on the conference has been that if the United States participates, it should take part from the start and not join on a later invitation. Today's communiqué indicated that such a condition would be met.

French Reds' Visit To Czechs Smooth

PRAGUE, Dec. 1 (Reuters).—A French Communist party delegation has left Prague with no mention of its policy differences with the new, tough Czechoslovak leadership over the 1968, Soviet-led occupation.

Rude Pravo, the Communist party newspaper, today published a brief communiqué following the visit of Etienne Fajon, a French party Politburo member, and his delegation, which left Saturday.

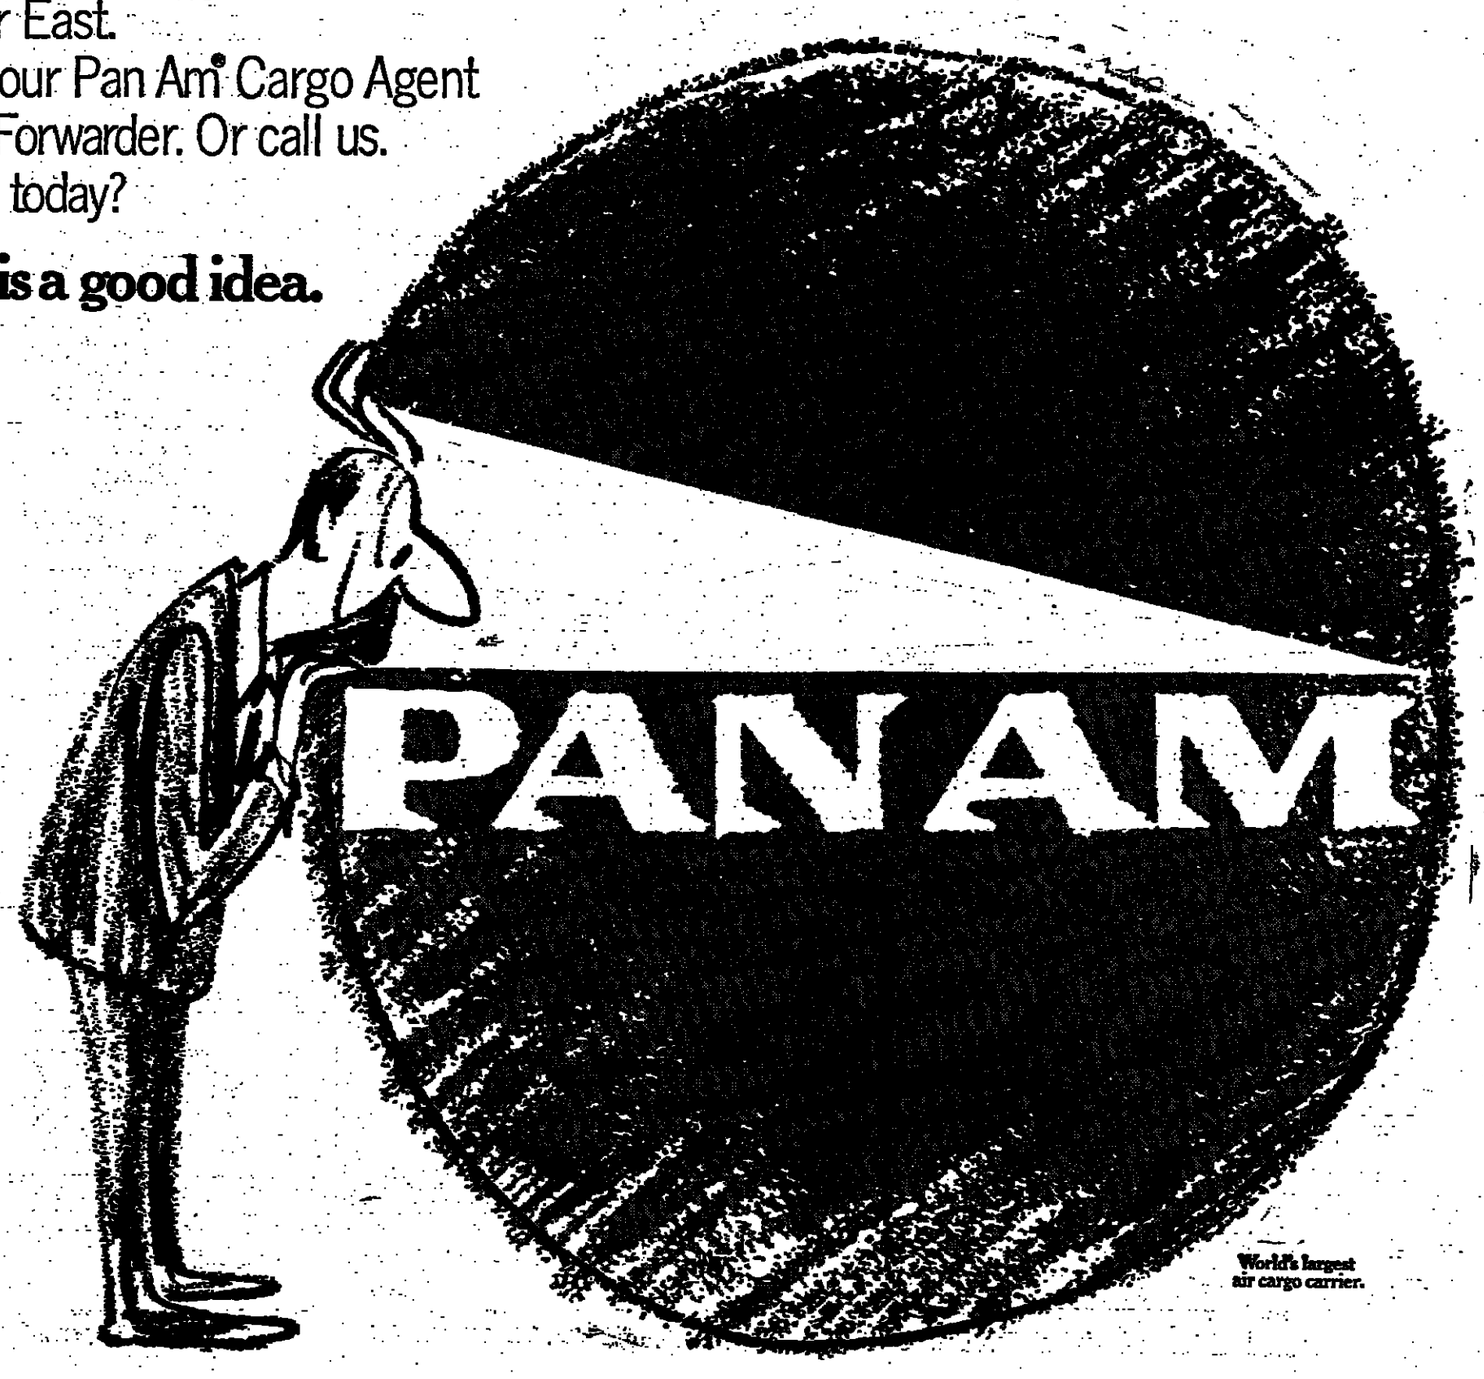

"Discussions were held in a comradely, sincere atmosphere," the communiqué said. "Each party informed the other of its activities and the situation in its own country."

LONDON

'I Seem to Appeal to a Weird Audience'—Sarstedt

By Nadeane Walker

LONDON, Dec. 1.—Peter Sarstedt, the young Indian songwriter who has become a pop star in spite of himself (his "Where Do You Go To, My Lovely?" topped the charts for five weeks last spring), was walking down the street to lunch in London the other day when he met a carbon copy of himself.

It gave him quite a turn, as the English say. Peter has been living in Copenhagen for the last three years, only coming to London for work, for instance the filmed TV series he's just finished on BBC-2. He hadn't noticed before that scores of youths have lately adopted the droopy Viva Zapata moustache and bearskin-shaped mop of hair that are Sarstedt trademarks. "I don't know why they do it," he said, "but good luck to them."

Besides his color TV series, which was so successful with viewers that BBC is delighted, Peter had a new record album, "As Though It Were a Movie," this fall, and is now finishing a musical play to be produced in the West End by Michael Caldron. The play is loosely based on the experiences of "two fellas wandering around Europe looking for a hard time." (Sarstedt, 27, spent two years busking or street-singing, sometimes in Paris in the company of Don Partridge, the one-man-band who made it to the top of the pops just before Peter). He is also doing a series on Radio One that has another month to run.

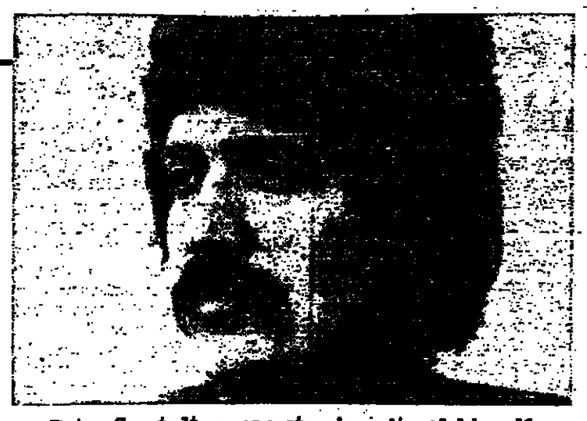

Peter celebrated the end of his first TV series by getting married on Nov. 2 to his Danish girl friend, Anita Atke, in St. Albans Church, Copenhagen.

The existence of Anita, a young dentist, has been known to Sarstedt's fans and public for some time. "All the teenagers write and say, 'I hope you and Anita will be very happy.' There's no hysteria in those letters, but I get some very strange ones from lonely older women, offering to be my mother, my sister, my mistress, my everything.

"I seem to appeal to a weird audience, not my sort of people. A mass of fans is a terrible thing—not for me." Peter's wry attitude to the pop world is no doubt conditioned by the fact that it's all happened before, to his brother, Eden Cane.

"I'd be on that tightrope myself, if I cared about the pop world, but I don't," he says. "What I call making it is being able to walk down the street feeling all right. As long as I can go on writing songs, I can do that.

"I only sang my songs myself because it was the only way I could make the recording companies listen to them." Sarstedt had already written more than 300 songs before he got busy on some new ones on historical characters (Hadrian, Rasputin, Lucretia Borgia and Napoleon) for a history theme on his TV series.

Peter Sarstedt, a pop star in spite of himself.

From the Inside

Each show was based on a different subject: "Age," "Women," "Happiness," "Bob Dylan," "History" and "Cool." Of the latter subject Sarstedt said: "I look at it from the inside, trying not to be condescending. I can't stand pop singers who stand up there and treat people like morons."

Born in Delhi of an Irish-Indian mother and German-Indian father, Peter was brought to England at the age of 11 and first sang in public at Croydon Civic Hall when he was 15. His father died while Mrs. Sarstedt and the three boys were en route to this country, and Peter says now: "If I make a fortune, and I think I will before I'm through, I'd like to buy my mother a nice house and furniture to make up for the struggle she had. It would make me feel better, salve my conscience, if I could."

With the fortune still in the future, Peter has just bought his first car, "A £120 Herald Triumph, about eighth-hand, I think. But they're paying me enough for an Australian tour in the spring to buy a house in Copenhagen for Anita and me. We want to have a lot of children.

"Because all the expatriates I've met have told me such awful things about America, I'd like to go there sometime just to disprove them. I might be able to learn something."

GENEVA

They Cater to Swiss Tastes

By Naomi Barry

GENEVA, Dec. 1.—This town has a stiff upper crust of money. Even mountains of money, however, can't buy what isn't there.

The Swiss don't want household jobs and are reluctant to allow into their tight little country the foreigners who are willing—for the fantastic sums offered—to make the beds and scrub the floors. The servants who do exist are seduced from mansion to mansion even though very few of them can dish up a presentable meal.

Nonetheless, society goes on. Holding up the party structure is one of the most fast-paced and imaginative catering services in Europe. Meals by Mövenpick are served by Mövenpick waiters in the best homes in the regions of Geneva, Lausanne, and Zurich. The name means "seagull," which may sound poetic in German despite the awful ring in English and French.

The supreme compliment one can tender this outfit is that it is so supple and varied that when you go to dinner at someone else's house you don't have the ghastly impression that you are sitting down to old Mövenpick again.

There are exoticisms like chicken Punjab style accompanied by a rice pellao nuggeted with raisins and pistachios, spit-roasted baby boar, sherbet of passion fruit as a palate clearer, vanilla ice cream topped by plums that have been steeped and stewed in wine for a fortnight.

The brainstorming young executives of the company pore through old cookbooks. When they hit on an intriguing item, try-outs are ordered in the Zurich test kitchen. Customers are aided in their selections by huge charts of color photos of the most succulent dishes, from which they can plan a menu from dozens of combinations.

Mövenpick will assume the responsibility of feeding from six to 600. Wine is priced by the bottle, rather than at restaurant prices (although the company has 12 restaurants in Switzerland).

Here is Mövenpick's recipe for emincé de veau Zuricholse:

Emincé de Veau Zuricholse

1 kilo veal rump
6 tbs peanut oil
5 shallots
2 ounces butter
3/4 cup white wine
1/2 cup fresh cream
2 cups sliced mushrooms.
Butter

Slice the veal and cut in equal strips. Flour the meat and season with salt and pepper. Brown in a Dutch oven with 6 tablespoons of peanut oil. Drain away the oil and add 2 ounces butter. Melt slowly. When butter begins to bubble, pour on the white wine. Evaporate. Add cream and mushrooms, which have been lightly sautéed in butter. Heat all together gently and serve.

PARIS

Oriented on the Seine

By Hebe Dorsey

PARIS, Dec. 1.—All the ladies are in a tizzy trying to figure out their costumes for Baron de Rédé's "Oriental Ball" Friday.

The ball will be a highlight of the Paris social season and will attract 400 carefully selected guests from at least ten different countries. An exceedingly elegant Parisian, the baron walks so stick-straight that it's both a worry and a surprise to see him sitting down. Famous for his immaculate taste, he lives in the Hôtel Lambert, a 17th-century gem of a house nestled at the tip of the Ile Saint-Louis. The house was built by Le Vau for a French finance inspector named Lambert.

The Oriental Ball is the baron's way of celebrating the restoration of the hotel, strictly a work of love on his part since the place doesn't belong to him but to Polish Prince Czaktoriesky. Since 1947, he has rented the top part of the hotel—including a magnificent Hercules gallery decorated by Lesueur. The other two lucky tenants are actress Michèle Morgan and Princess Ghislaine de Polignac.

Although he is far too chic to mention a figure, the baron must have spent a fortune to restore the façade, frescoes and garden to impeccably precise 17th-century beauty.

Talking in his library where the portrait of the severe Lambert still sits over the mantelpiece, the baron, who has a cool manner but warm eyes, explained that the idea of an Oriental party was sort of a natural since the 17th century went mad for the East. He turned over the decoration to Valerian Rybar and Jean-François Daigre but the hotel is so perfect that it's hard to see how it could be improved upon.

"The costumes should be easy," the baron said. "It's a very convenient theme that shouldn't call for much. Even a turban will do."

The baron is underestimating his guests. All the Paris couturiers, hairdressers, hatmakers, and costume makers are going crazy and working overtime to deliver the Chinese, Russian and Persian extravaganzas that fall under what one loosely calls the Orient. While some women are taking the trouble to have costumes made for the occasion, many find it simpler to rent them.

Rosemary Kanzler is lucky. She won't have much to worry about after she puts on her 17th-century Indian maharajah necklace, all emeralds, rubies and pearls. Omar Sharif may—and should—come as himself. There is a rumour that the Vicomtesse de Ribes will arrive with a cheetah and a slave—both of which, however, she'll have to check at the door.

ROME

The Many Faces of Pinocchio

By Shari Steiner

ROME, Dec. 1.—For a puppet with a preposterous nose, Pinocchi has become quite an adult preoccupation. As 1969 finishes up, no less than three major Pinocchio projects are in various stages of completion, and not one of them is designed to appeal primarily to the under tens.

The biggest fanfare accompanied the Baldini and Castoldi collector's edition of the book, which comes complete with 26 Ercoli Brini reproductions. The book was greeted by an exhibition at the Palazzo Barbarini, and is now available at art bookstores.

Meanwhile, Nelo Risi is working on his production of "Nasty Pinocchio," and Federico Fellini has announced that he is interested in the idea for a short television feature.

All this over a story that was once considered a minor work of Carlo Collodi.

In his own time, Collodi was considered a writer of plays and novels and was a prefect of Florence.

A Pen Name

Collodi was born Carlo Lorenzini in 1826 in Florence. When he took up writing as a spare time occupation, he adopted the pen name of Collodi.

The story goes that after Collodi had written several plays and novels, Ferdinando Martini, the editor of the weekly "Giornale per i Bambini" wrote him, asking if he would contribute a story.

He never replied until one afternoon he arrived in the Piazza della Signoria complaining about a dream he had had. He returned to his house, wrote rapidly, finished the first chapter of Pinocchio, and sent it off to Martini for his children's newspaper.

Martini was delighted and promptly printed the story on page three of his next issue. His readers responded with a flood of letters about the strange piece of wood, which could talk, but had yet to fall into the hands of Padron Geppetto and become a puppet.

One person was not so enthusiastic, Collodi. He had had his dream and written his story, and he was busy being prefect. It was several weeks before Martini could pull the next installment from him.

Cliff Hanging

Events continued pretty much in this vein. Whenever Martini could convince Collodi to get back to the writing desk, he had his readers demanding to know what was going to happen next. Collodi had a talent for getting Pinocchio out of one scrape, into his next predicament... and leaving him there.

By 1883, Collodi tired of the game and closed the issue altogether. Pinocchio—who had enjoyed being a donkey, dropping out of school, having a built-in lie detector, and all kinds of other contemporary experiences—became a flesh and blood boy.

As far as Lorenzini was concerned, it was over. He died seven years later, apparently happier over his novels and his plays and his prefecture.

However, the first Pinocchio edition, illustrated by Mazzanti, had already appeared. Very soon controversies sprang up over intellectual interpretation of the story.

Good for Children?

Was the book good for children, people wondered, what with Pinocchio openly rebelling against school and work (until his magical conversion in the last chapter).

Soon the Freudians put in their interpretations on Pinocchio's fascination with a family and his secret desire for Mamma. Di Volpicelli went on to point out that Pinocchio was a socialist hero who anticipated the Italian democracy.

The world, however, was unaware of these scholastic arguments. Walt Disney turned Pinocchio into a pre-Dennis the Menace.

The Intellectual Side

Children everywhere, were enthralled. Germany had her Grimm collections. Denmark had her Andersen Fairy Tales. Italy had her Pinocchio.

Competition for Atom sher Grows in Europe

By Thomas J. Hamilton

Dec. 1 (NYT).—The an countries that are o have a $334 million er built on their ter- resorted to a war of st their competitors. a month remains be- nation governing coun- N European Organiza- uclear Research) meets ot the site of the giant icle accelerator. France, West Germany, Italy are all lobbying to obtain support for ates, most arguing that fered by the opposition ne fatal drawback. already the leading has been accused by itors of having spon- port that France will rom the race in favor lan candidacy. Paris is ave given a commitment of some sort last year in a final—and successful—effort to persuade Belgian Air Force officials to buy 118 Mirage fighter planes instead of the American F-105s.

Ambiguous Promise

According to an authoritative source, the French commitment was in very ambiguous language. The French, he said, promised to support the Belgian site Focant, in the Ardennes, if it was found to be acceptable "in technical terms."

However, the French have never explained whether this meant they would support Focant against their own candidate, Le Luc, about 30 miles inland from Saint-Tropez.

Focant supporters point out that the French did not decide to subscribe to the $100 million French assessment for the accelerator until last week. They also argue that France will withdraw the candidacy of Le Luc because this would involve spending at least $5 million more to provide houses, connecting highways, and other parts of the infrastructure for the accelerator.

It is generally believed, however, that France only promised to support the Belgian site in the event that Le Luc is defeated. Similarly, Austria has promised to vote for the Italian site if it loses the fight to have the accelerator placed in Austria.

Capacity of Smasher

It will take eight years to build the accelerator, which will be rated at 300 geiger electron volts and will require a staff of 5,000. It will be the largest in Europe and is expected to attract nuclear scientists from all over the world.

West Germany, which has promised to contribute 35.82 percent, will pay the largest share of the costs. France will pay 30.6 percent; Italy something less than 20 percent; Austria 3 percent; Belgium, about 6 percent, and Switzerland—the only participant that is not trying to have the accelerator placed on its territory—about 5 percent.

The Swiss do not want to hand over the 12 square miles of land that will be required for the accelerator and for the city of 20,000 people to be built around it. The accelerator itself will occupy a circle with a diameter of 1.5 miles on land that is not only flat but also impervious to any vibration.

A two-thirds majority—eight out of the 12 delegations at the Dec. 18 meeting—will be required to decide where the CERN accelerator will finally be placed.

Construction Contract Total Rises in U.S.

But Indicator's Jump Result of 'Distortion'

NEW YORK, Dec. 1 (NYT).—Contracts for future construction work in the United States surged in October, but the jump in this prime economic indicator was immediately discounted as indicating a failure of the federal government's tight-money policy.

The latest month's total of newly contracted construction work was $8.24 billion, an increase of 1 percent over the level of October, 1968. For the first ten months of 1969, total contracts were $58.07 billion, or 11 percent above the level for the first ten months of last year.

These figures were reported yesterday by the F. W. Dodge division of McGraw-Hill Information Systems Co., which specializes in marketing statistics for the construction industry. The seasonally-adjusted Dodge index of construction contract value stood at 195 for October, compared with the September level of 173 and 216 in August. In October, 1968, the index was 200.

George A. Christie, F. W. Dodge chief economist, explained that the latest spurt in the Dodge index did not necessarily indicate a trend toward increased construction activity.

"Unusually wide month-to-month swings in the index have been making it hard to see the construction industry's reaction to tight money and cuts in public spending, he said. But since last summer a pattern has been taking shape. The pattern can be described as 'racheting down,' with the monthly dips deeper lately, and in keeping with this pattern the October rebound was weaker than before. The net result is generally a downtrend in future contracts."

Sohio-BP Merger Settlement Filed

WASHINGTON, Dec. 1 (Special).—The Justice Department today filed simultaneously a civil suit attacking the merger of BP Oil Corp. and Standard Oil Co. of Ohio and a proposed court settlement of the charges.

A consent decree, expected to become final in 30 days, would allow the Sohio-BP merger as long as Sohio divests itself of retail outlets accounting for taxable motor fuel volume in Ohio of not less than 400 million gallons annually. The proposed terms were announced Nov. 17.

In addition, BP or Sohio would have to sell off all retail gasoline outlets owned or controlled in Western Pennsylvania.

Swiss Secrecy a U.S. Irritant

By Neil Sheehan

WASHINGTON (NYT).—Last spring, the senior partner in a New York brokerage house was told by the vice-president of a Swiss bank with whom he regularly did business: "A fellow will come to your office in the next few days with $100,000 in cash. Take it. The money's for us."

Several days later a man appeared with $100,000 in cash in an envelope. The broker accepted it without demur and put the money in a safe. Others came and went until the broker had accumulated $840,000 in cash.

The Swiss bank official flew to New York on one of his frequent trips to the United States to solicit business and to pick up this and other deposits.

Morgenthau Asks

Both he and the broker were summoned to the Manhattan office of Robert M. Morgenthau, U.S. Attorney for the Southern District of New York.

"Do you know what you've been doing?" they were asked. "No," the men replied in puzzlement.

"You've been taking payoffs for heroin."

The eyes of banker and broker rounded in shocked surprise. "We didn't know that," they said.

"I thought it was something a bit illegal, maybe diamond smuggling," said the Swiss banker, "But I didn't know it was narcotics. If I had, I would never have accepted the money."

Mr. Morgenthau and other U.S. law enforcement authorities have found this attitude to be common to most of the Swiss and U.S. banking and brokerage community.

Coupled with Swiss bank secrecy, the attitude has repeatedly frustrated their efforts to restrict the use of Swiss banks, not only for massive tax evasion and securities frauds by supposedly respectable Americans, but also as the principal haven for illicit money from organized crime.

On The Schrager Case

The late Louis Schrager, a principal figure in the Meyer Lansky crime syndicate who ran a large New York numbers racket until his death in 1967, negotiated one of many profitable arrangements for himself through a Swiss bank and an old-line New York private bank and brokerage firm, Laidlaw and Co.

In April 1964, Mr. Schrager wanted to transform about $400,000 worth of 3 to 4 percent municipal bearer bonds, a negotiable type that does not carry the purchaser's name, into a better investment.

He had the bonds turned over to the Nassau, Bahamas subsidiary of a Geneva bank. Bahamian civil law protects bank secrecy there.

Using the bonds as collateral, a vice-president of the Swiss bank negotiated a $375,000 loan from Laidlaw to the Bahamas subsidiary.

The $375,000 became a time deposit for Mr. Schrager at the Bahamas subsidiary and paid 5 percent interest. Laidlaw charged 5 percent interest for the loan and the Swiss bank in turn got $375,000 to lend elsewhere.

Enter ISIS Ltd.

To prove it could negotiate the bonds, the Swiss bank gave Laidlaw a letter of transmittal from the purported owner. The letter was signed, "ISIS Ltd., Gene Bernard." No address was given. Laidlaw's attorneys looked over the documents and approved the transaction as legally sound. No one asked what ISIS did or who Gene Bernard was.

Gene Bernard is an alias of a Miami accountant and ISIS Ltd. was a dummy corporation administered by him and a lawyer-accountant team in Cleveland.

The 2.5-year loan was terminated in October, 1966. By that time Laidlaw's interest charge had risen to 6 3/4 percent.

Trading for Others

U.S. brokerage firms likewise restrain their inquisitiveness when buying or selling stock for a Swiss bank, although brokers readily concede their awareness that the Swiss are probably trading for a third party.

Bankers and brokers usually say they are merely performing a professional service and that questions about the real participants would be inappropriate.

The question is: What is criminal? The answer seems to be that it depends on which legal system you favor.

Swiss bankers can be forced to give information on order from a Swiss court, but only for offenses recognized as crimes in Switzerland, and tax and securities violations are not considered criminal there.

An effort to negotiate a legal assistance treaty between the two nations has so far not progressed beyond comparisons of their contrasting legal systems. The Swiss authorities have categorically warned that if a treaty does emerge, it will not include provisions for legal assistance in tax and securities frauds.

U.S. Prosecution Problem

These loopholes have made Swiss banks particularly attractive to organized crime, because tax, securities and postal violations are usually the only offenses for which U.S. officials can successfully prosecute, for example, Mafia figures.

In this manner Swiss bank secrecy is fostering the growth of a phenemenon that law enforcement officials consider highly corrosive to the social fabric—partnerships between supposedly legitimate businessmen and organized criminals for mutual gain.

In carrying on discreet business with U.S. clients, the Swiss banks have found powerful allies within the U.S. financial community.

The Treasury wants Swiss cooperation in maintaining the international balance of payments and monetary stability. The State Department is intent on preserving good relations because the Swiss have been helpful in U.S. intelligence gathering activities. U.S. banks, and their allies, the brokerage houses, have a compelling financial stake in unhampered commerce with the Swiss—last year, Swiss banks bought and sold $11.3 billion worth of U.S. stocks and bonds, by far the largest foreign traders.

Many big American banks are, in fact, seeking legal precedents that would allow their Swiss branches the same immunity from U.S. courts and authorities that Swiss banks have.

The German Case

Last year, First National City Bank and 13 of the nation's other largest banks, fought against surrendering the records of a West German branch when asked by a U.S. court.

The banks argued that Germany has a national policy of bank secrecy. Vulnerability of foreign branch records to U.S. law enforcement would have an adverse impact on the balance of payments by impairing "the economic opportunities for American business abroad" and the ability of American banks to compete with their foreign rivals, they contended.

In this case, the court ruled against the banks on the ground that German bank secrecy was traditional but not spelled out in law. First National City did not surrender the records, however, until one of its vice-presidents had been sentenced to 60 days in jail for contempt and the bank fined $2,000 a day for each day's delay.

Given the determination of the Swiss bankers to preserve their secrecy, the basic differences between the Swiss and American legal systems, many observers feel there is little that can be done to frustrate illegal use of Swiss banks by negotiations between the two countries.

In the view of most students of the problem, any effective measures will have to be taken unilaterally.

And Chairman Wright Patman, D., Texas, as a framework for the forthcoming House Banking and Currency Committee investigation, has drawn up a bill that, if enacted, would strengthen federal laws regulating transactions between foreign banks and U.S. citizens and corporations. The bill would also give American authorities additional means of investigation and enforcement.

U.S. Giants Hit

Prices Sag on Broad Front In N.Y.; Test of Lows Seen

By Vartanig G. Vartan

NEW YORK, Dec. 1 (NYT).—The New York Stock Exchange started a new week today with the same old worries—tight credit, Vietnam, tax selling—and their combined weight sent prices steadily lower.

Trading volume remained relatively low and that was a worry, too. Turnover ran 9.95 million shares, or well below the year's daily average of 11.3 million. Volume had dropped to 8.55 million shares last Friday, a slow session sandwiched between Thanksgiving Day and the weekend.

It was "Blue Monday" for both glamours—which had been strong in the final two trading days of last week—and for blue-chip issues.

IBM, the largest holding among institutional portfolios, went against the general market, however, gaining 3 to 380.

In the computer group, Memorex plunged 7 1/2 and University Computing fell 5 3/4. Motorola dropped 6 3/8 to 130 5/8. American Research & Development slipped 3 to 79 3/4. Walt Disney Productions, one of last week's big winners, declined 4 to 120 on profit-taking.

The Dow Jones industrial average moved lower with each successive half-hourly reading, after starting out with a token advance of 0.46 point at 10:30 a.m.

Without producing any hint of a rally, the Dow finished with a loss of 7.26 at 805.04. In the last three weeks, this key barometer has toppled 58.01 points.

Thus, for the fifth time since mid-summer, the "battle of the 800" has been joined again. The market currently is testing this year's closing low of 801.96 on July 29 and one Wall Street analyst described the 800 level as "an area of crucial technical importance."

Only four of the Dow's 30 components displayed a gain. The best showing came in Woolworth, up 3/8 to 39 3/8.

But the shattering impact of the market's recent decline was demonstrated in the price action today of some of the biggest and best-known industrial giants in the United States.

Du Pont fell 1 1/8 to 108 1/4, its lowest price in more than a decade.

U.S. Steel eased 1/4 to 35 1/8, a new low for this year. Except for its price of 35 at the bottom of the 1966 market break, this represents the lowest price for U.S. Steel in nearly 15 years.

General Electric also closed at its low for the day. It dropped 5/8 to 79 12, thus reaching its lowest price in five years. The company is now in the sixth week of a nationwide strike.

General Motors, the biggest industrial company in the world, fell 3/4 to close at 70 1/4 after equalling this year's low of 70 1/8.

U.S. Market View Brought To Europeans

By Carl Gewirtz

LONDON, Dec. 1.—A glitteringly realistic montage of life in America—from hippies doing their thing to political, racial and social strife—opened a three-day conference here today on one of the fastest growing U.S. exports: money-making in the stock market.

The filmed montage, and the speakers and panel discussions which followed, were for consumption by representitives of institutional investors all over Europe.

"It's no secret the United States is going through a social upheaval," said Gilbert E. Kaplan, the opening speaker, who publishes the Institutional Investor magazine in New York and who organized the conference.

But he also forecast that the problems would be resolved through "huge social programs" which would fuel public works and keep a number of industries—which would make good investments—busy and profitable.

The conference, sponsored by 20 leading U.S. brokerage houses, drew several hundred European bankers, brokers and investment trust officers.

The speakers' list, testimony to the importance of the billions of dollars these money managers trade in U.S. securities, today included Robert W. Haack, president of the New York Stock Exchange; Richard W. McLaren, assistant U.S. attorney general and chief of the Justice Department's anti-trust division, and leading members of the New York investment community.

Mr. McLaren, at pains to bury the international bruhaha stirred by his threatened injunction against the recently approved merger of Standard Oil of Ohio and the U.S. subsidiary of British Petroleum, assured the businessmen that "we welcome foreign investment in American business enterprise and we welcome the infusion of new capital into American markets."

He again strongly denied interpretations that had the United States using its anti-trust policy as "a nationalistic, or protectionist" tool. But, he said, "we have no alternative but to consider possible anti-competitive consequences when a foreign firm seeks to enter our market by making an acquisition of a major firm."

On U.S. policy toward conglomerates, he stated that "we do not oppose either conglomerate firms as such, or, indeed, conglomerate mergers as such."

At the same time he added that: "Whatever the cause—whether it be the decline of the stock market, record high interest rates, threatened tax legislation, or our activities—mergers among giants, and acquisitions by the giants of leading firms in other industries, are much fewer . . . today . . . I regard this . . . as a healthy development."

Mr. Haack reviewed worrisome back office problems which he said Wall Street is overcoming and the coming automation of the securities business. He predicted that by the mid-1970s peak turnover on the Big Board would hit 25 million shares a day and that by 1980 peak daily volume would be around 60 million shares.

U.S. Commercial Paper Explosion Still Going Strong

NEW YORK, Dec. 1 (NYT).—The explosive growth in the U.S. commercial paper market continued during October, the Federal Reserve Bank of New York reports.

Total paper outstanding shot up by $1.8 billion during the month, the Federal Reserve said, to a new high of more than $32 billion on a seasonally-adjusted basis. This is $11.1 billion, or 53 percent, higher than the level on the same date a year earlier.

Much of the push behind the rapid growth in these unsecured corporate notes that are sold to investors in the open market, the N.Y. data showed, came from notes sold by bank holding companies or other "bank-related concerns."

Total bank-related paper was put at $3.6 billion at the end of October, up more than $1.1 billion in the month, not seasonally adjusted.

EFTA Reports Narrowing of Trade Deficit

GENEVA, Dec. 1 (AP).—A further reduction of the trade deficit, sluggish sales to the United States and large exports to the European Common Market area marked the first nine months of the European Free Trade Association this year.

A preliminary EFTA report released today said that total imports of the eight-nation area, at $32 billion, were 9.4 percent higher than in the comparative 1968 period, while exports, at $27.6 billion, had increased by 15 percent.

While sales of all EFTA countries grew strongly during the first nine months of 1969, Denmark, Finland, Sweden and Switzerland recorded an even stronger growth in purchases. Imports by Norway and the United Kingdom increased slowly and those of Portugal even fell off by 2 percent.

During the period, the EFTA countries' trade with the Common Market showed a 19 percent rise in exports and a 10 percent jump in imports over the January-September 1968 period.

Increased exports to the community were largely the result of sharply higher sales to France and Italy during the first half of this year as well as to continuing high demand in West Germany.

Trade with the United States rose relatively slowly, with imports at 7.4 percent and exports to the United States only 1.4 percent higher. Increased sales to the United States from Austria, Denmark and Finland were compensated by a lowering of exports from Britain and Sweden.

EFTA exports to the rest of the world were 15.8 percent higher, with all member countries except Portugal sharing in the increase. Imports from the rest of the world were, however, only 6 percent higher, with Portugal and Norway recording reductions of about 5 percent.

Trade between EFTA member countries totaled $7.34 billion during the period, 15.7 percent more than year-ago totals, largely because of a recovery of exports by Britain.

Blessing Urges Cut In Exports of Capital

MUNICH, Dec. 1 (Reuters).—West German central bank president Karl Blessing said today that Germany cannot go on being the world's largest exporter of capital.

Speaking to the local Social Democratic advisory committee, Mr. Blessing urged a significant cut in Germany's capital exports to around 300 million marks ($82 million) a month from the present 1 billion marks.

He said responsibility for curbing the German economic boom, which many find disturbingly inflationary, lay with the central bank, which is determined to bring it under control.

If the central bank does not keep a tight rein on money circulation, prices will rise still further, Mr. Blessing said.

BANQUE NATIONALE DE PARIS

The position on of November 4, 1969, totals 42.9 billion France, compared to 42.1 billions on September 30, 1969.

Under Liabilities, deposits of the clientele represent 29.3 billion Francs.

Under Assets, "Current Accounts" and "Guaranteed Advances" show a total of 5.5 billion francs.

Funds available reach 32.8 billion Francs.

Tenneco's
9-month report:
Sales up 20%
Net income up 13%
Earnings per share
up 15%

Tenneco Inc. is the U.S. company that makes a business of building businesses.

And, in the first 9 months of 1969, Tenneco continued building its businesses at an accelerated rate.

Sales were $1,780,740,302, compared with $1,473,625,362 for the same period in 1968.

Net income before extraordinary items was $122,012,073, up from $108,057,954.

And earnings per common share for the first three quarters rose to $1.70, as compared to $1.48.

In just 26 years Tenneco has grown from nothing to the 16th largest U.S. industrial corporation in assets, which now exceed $4 billion. Annual sales top $2.4 billion.

Tenneco's major business areas are natural gas pipelining. Oil exploration, production, refining, marketing. Chemicals. Manufacturing of construction and agricultural machinery, automotive components. Shipbuilding. Packaging. Land use and development.

In spite of higher operating costs, Tenneco expects 1969 to be the most profitable year in its history.

QUESTION:

Can any big Winners Develop in this Market?

ANSWER: Yes. Strength in base metal prices makes for favorable market conditions for the emergence of a handful of big winners that can double in price on good news. Inflationary pressures are abating in spite of heavy pressure by labor. The war in Vietnam is far from over but Washington clearly wants to get out of the conflict and its heavy financial drain. A relative calm has settled over the monetary scene since the Deutschmark was revalued. By this we mean that people are looking for new stocks with which they can recoup the losses they are taking in the old ones. As soon as anything begins to make a move it will have no trouble getting the complete attention of the trading public—who are literally starved for something in which they can show a profit.

QUESTION: But is the market strong enough to let something get hot?

ANSWER: Yes—and it has more things going for it than people realize. It has good leadership from Wall Street, for one, where the Dow Jones average is back near 800, which is buying range. It has new and exciting discoveries ranging from oil and gas in Alaska and the Arctic, copper in Mexico, nickel in Australia, to uranium and silver in Canada. It also has stocks groomed for major gains and a few winners already developed to the point that they can lead a new advance. So it has many things in its favor—not the least of which is that the first stock to excite traders will act as a catalyst for dozens of other prospects to run from dimes to dollars per share.

QUESTION: What about my stocks? Will they too go higher?

ANSWER: Depends on the stocks you hold. If they have good earnings and sound asset values then they could stage a comeback. But if they have been subject to round after round of heavy distribution at high prices then their comeback chances are slim and the best thing to do is sell them, for by continuing to hold them in the vain hope that something will happen to make them go higher, you not only are fooling yourself but you are giving your losses a chance to grow worse.

QUESTION: Can the Kanadisch-Amerikanischen Börsenbriefe help me make money?

ANSWER: See for yourself. Give us six weeks in which we can tell you which stocks to buy and sell and where to reinvest the profits and we think we will be able to prove to your satisfaction that we can. We don't promise to make you wealthy overnight but we do promise to deliver a sound and sensible trading approach that can help you make money. The cost of the six-week trial is only $8. Send your cheque or money order to:

Kanadisch-Amerikanische Börsenbriefe
6 Frankfurt/M., Gutleutstr., 47
Postfach 16449.

International Commodities Investment Fund

I.C.I.F. is the only Mutual Fund with a proved success record of investing directly into the commodities futures markets, a field of investment normally not available to the general public. Leverage up to 200% is available to approved clients.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the lat quarterly or emi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. d—Declared or paid in 1969 plus stock dividend. e—Paid last year. f—Payable in stock during 1969, estimated cash value on ex-dividend or ex-distribution date. g—Declared or paid so far this year. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in 1968 plus stock dividend. t—Paid in stock during 1968, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year' high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BLONDIE

BRIDGE — By Alan Truscott

East opened with three diamonds and so gave South an "impossible" problem. All the possible actions for him—double, four clubs, three spades and three no-trump—had major disadvantages. He settled for a bid of three no-trump, conveying a fair impression of his strength and trusting his partner to hold something in hearts.

North made a cue-bid of four diamonds, urging South to show a major suit if possible. South obliged with four spades, and North continued with a Blackwood bid.

At the six-level North changed her mind about the final contract, selecting no-trump instead of spades; she judged from the opening bid that there would be bad suit-breaks, which might inconvenience South less in a no-trump contract.

This was an accurate judgment up to a point. The normal contract of six spades is shipwrecked by the bad breaks in spades, hearts and clubs after a neutral lead. The prospects of six no-trump were distinctly poorer, but West led the diamond jack.

The diamond jack was covered by the queen, king and ace. South cashed the heart queen and led to the club ace. This was followed by the ace and king of hearts. South was astonished to see West show out on the third round, revealing that East had begun with five hearts as well as his long diamond suit.

The heart suit was now useless, so the declarer led a spade to his queen. When East followed, the entire distribution became clear. So did the road to 12 tricks. South cashed his remaining spade tricks and the diamond ten. He was left with K-10-7 of clubs and he knew that West still held J-9-8 in that suit. So the club seven was led, and South scored the last two tricks in clubs to made his slam.

	NORTH ♠ K873 ♡ AK1082 ◇ Q52 ♣ A	
WEST ♠ 10642 ♡ 65 ◇ J4 ♣ J9832		EAST (D) ♠ 9 ♡ J9743 ◇ K98763 ♣ Q
	SOUTH ♠ AQJ5 ♡ Q ◇ A10 ♣ K107654	

North and South were vulnerable. The bidding:

East	South	West	North
3 ◇	3 N.T.	Pass	4 ◇
Pass	4 ♠	Pass	4 N.T.
Pass	5 ♡	Pass	6 N.T.
Pass	Pass	Pass	

West led the diamond jack.

JUMBLE® — that scrambled word game

by HENRI ARNOLD and BOB LEE

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

GOLIO

NEVET

NARFIA

ERKLAT

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

ANSWER here: ( ) ( ) ( ) ( ) THAT ARE ( ) ( ) ( ) ( ) ( ) ( ) ( ) YOU

(Answers tomorrow)

Yesterday's Jumbles: FAVOR DROOP JASMIN AFRAID

Answer: *You'd put this off till nighttime*—PAJAMAS

BOOKS

COUNTERBLAST

By Marshall McLuhan. Designed by Harley Harcourt, Brace & World. 143 pp. $6.50.

THE INTERIOR LANDSCAPE

The Literary Criticism of Marshall McLuhan, 1943/196

Edited by Eugene McNamara. McGraw-Hill. $6.95.

Reviewed by John Leonard

NOT THAT any post-literate needs reminding, but let us, loud enough to fill all the available acoustic space, blabbercast the FIRST, SECOND AND THIRD PRECEPTS OF MOBIOUS THE LOOPED: (1) Western man's fall *from* grace was a fall *into* syntax, but of the haptic harmony into the alphabet *soupçon;* (2) With the invention of movable type *we sold our Gestalt for a mess of dualities*—eye-candancy in the sensorium disequilibrates; (3) We shall escape our consequent dynamic of violence through subliminal tribalization via the LP record, the TV set and the computer. "Circuitry is the end of the neolithic age," boasts "Counterblast." "Computer speed and inclusiveness is LSD for business . . . electricity creates musical politics . . . the prayer mat will succeed the Cadillac." Hanging tense as we surf the electromagnetic wave . . .

Once upon a time, as "The Interior Landscape" demonstrates, Marshall McLuhan was a good literary critic. He wrote harmless essays for the usual quarterlies on the usual subjects: Poe and Pope, Joyce and Pound, technique vs. sensibility, analogical mirrors. Yes, there was an agenbit of Innis-wit, but the stuff was solid. Then on the banks of the Sewanee Review he lay down with the mechanical bride and they performed all sorts of unnatural acts.

Now, as demonstrated by the typographical acid-trip called "Counterblast," his thing is manufacturing gloss for the gross. "BLESS MADISON AVENUE FOR RESTORING THE MAGICAL ART OF THE CAVEMEN TO SUBURBIA." The bookman (who used to identify technological components in artistic innovation) has become the adman. He stopped laughing at his own jokes, the butts of those jokes, and himself. A terrible, messianic seriousness side-whelmed him.

Since there is obviously a McLuhan implosion—hail the apologist, bearing apercus—it is obviously recumbent upon the reviewer (who takes everything lying down) to wonder whether McLuhan's typographical conspiracy with Parker is anything more than an easy trick. Wouldn't any other type arrangement have disserved the reader just as much? Can you have your book and beat it, too? Isn't it odd that most of his puns are visual (unlike the Joyce he's always squeezing, and who of course was going blind)? But he has delivered himself into the claws of packagers, and neither he nor the packagers care about content.

Equally irrelevant (as content, as criticism) are a reviewer's qualms about McLuhan's contempt for a "moral," "ethical" or "cathartic" view of art. He proposes a cognitive recapitulation: the form of an art-work imitate the confusion perceptual apparatus, don't point. Instead, we have strategies for

Never mind, then, man seems basically fuse information rece which, after all, the superior tool) with tion-processing (whic to an organizing visic straction, a com "truth"). Why Sonny Gets Blue

Skins Tough, Rams Rougher

By William N. Wallace

SHINGTON, Dec. 1 (NYT).—Los Angeles Rams overcame Jurgensen, the Redskins' ening passer, a flag-dropping of officials, and the odds t winning 11 straight games a National Football League day as they beat Wash-, 24-13, and clinched the l Division title.

ory for the undefeated Rams ot come easily against a Redskin team which made a ive effort beyond anyone's ations. The Rams were un-o lock up the contest until the final period when Jim s, a cornerback promoted to r status for this game, in-ted Jurgensen's 29th pass, of he threw.

les returned the interception rds to the Redskin 2 but a y, one of ten against Los ss, set the team back to the three plays the Rams ram-he ball over the Washington Willie Ellison scoring from and extended their lead from e four points, 17-13, to 24-13, 1/2 minutes to play.

ensen, who was dropped six while attempting to pass for of 52 yards, had one final that closed out the game. It when Richie Petitbon inter-his last pass in the end with 27 seconds left.

For the Defense

rge Allen, the Ram coach, atulated his team for hold-Washington to no touchdowns two field goals for three ls and for the great rush put e fast-throwing Jurgensen.

e story of our 11-game ," he said, "is that we make g play when we have to."

cited two big plays, Nettles's eption and a blocked punt in econd period.

son blocked the Redskin kick e the Rams the ball on the n 22 and they scored their touchdown to go ahead, 10-3, lays later as Roman Gabriel one yard to Bob Klein, the tight end, in the game on a ine formation.

Rams were able to mount one lengthy touchdown drive st the staunch Redskin de-fense, and this came in the third period when Gabriel shifted tactics from a passing game to a running one. The Rams' two big running backs, Les Josephson and Larry Smith, ground out 41 yards on sweeps with Charlie Cowan and Tom Mack blocking. Gabriel passed to Bill Truax, his tight end, for three yards and the score at the start of the last quarter. This gave Los Angeles a 17-6 lead.

Not Safe

It was not a safe lead because Jurgensen figured out a way to escape the Ram pass rush led by the devastating Deacon Jones and Merlin Olsen. He rolled to the right or left and threw flare passes to his fullback, Charlie Harraway, on a 67-yard drive that closed with Harraway scoring from the 1 for Washington's only touchdown. That left the Redskins down by only 17-13 with plenty of time left —9 1/2 minutes—to accomplish an upset.

But the Nettles interception and the subsequent Ram score wiped out that possibility and set up the Rams for the Western Conference playoff game against Minnesota on Dec. 27. Next Sunday will see a preview of that game as the Vikings play the Rams in Los Angeles with nothing at stake, except pride.

Penalties in this game were so numerous, 16 in all, that Tom Catlin, a Ram coach, said: "It looked like an NBA basketball game."

The Ram winning streak is the first of such length in the NFL since the Cleveland Browns also won 11 straight in 1953. The league record is 13 straight by the Bears of 1934.

Packers 20, Giants 10

Don Horn connected on long passes for two touchdowns and Travis Williams ran 27 yards for another as Green Bay defeated New York, 20-10. The victory snapped a three-game losing streak for the Packers and extended the Giants' losing string to seven. Horn, substituting for the injured Bart Starr, threw a 39-yard scoring pass to halfback Donny Anderson late in the first quarter and hit Caroll Dale on a 41-yard play with just 38 seconds to play in the half. A 57-yard punt return by Williams set up the Packers' second touchdown. The long throws helped overcome a surprising Giant offense that had controlled the ball for most of the first half and piled up 263 yards to only 127 for Green Bay.

Ottawa Wins Grey Cup

MONTREAL, Dec. 1 (UPI).—Ottawa Rough Rider quarterback Russ Jackson, playing the last game in his 12-year career, threw four touchdown passes, including two to veteran halfback Ron Stewart, as Ottawa beat Saskatchewan, 29-11, and won the 1969 Grey Cup game yesterday.

Associated Press.

THE SPOILS—Arnold Palmer and friend after he won first tourney in nearly 15 months.

First Victory Since Sept., 1968

A Struggle, But Arnie Wins One

HILTON HEAD, S.C., Dec. 1 (AP).—Arnold Palmer struggled and strained to a three-over-par 74, but snapped a year-long slump with a three-stroke victory over Dick Crawford and Bert Yancey yesterday in the $100,000 Heritage Golf Classic.

There was none of the old charge that marked many of his 50-odd previous victories, but this must have been one of the most welcome. It came after many of his critics said Palmer would never come back.

Age, putting troubles, and too many victories that dulled the edge, and the influx of new, dynamic talent into the game, and the hip trouble that forced him off the tour, they said, would deny the game's most dynamic performer any further victories.

The triumph, forged in sunny, chilly weather on the tough little Harbour Town links, was his first since Sept. 15, 1968, in the Kemper Open.

"I can hardly remember what it feels like to win," Palmer said after his par on the final hole assured him of the $30,000 first prize.

"I guess I'm just going to have to keep practicing this winning. Maybe then I'll remember."

For Palmer, the only golfer to win more than a million dollars in prize money, it had been a disastrous year. His poor form reached a head in August when he withdrew from the PGA tournament after scoring a 12 on a hole in the first round.

After the PGA he did not compete for another two months, during which he was under constant medical treatment for a hip ailment. Since returning to the circuit in October in the Sahara Open, Palmer has been close to the lead in several tournaments. But it was not until this next-to-last tournament of the 1969 tour that he played consistently enough to win.

Palmer led throughout the tournament and finished with a 283, the third highest winning score of the year and only one under par for the tournament. Crawford had a 74 and Yancey a 72 for their 288s.

LEADING SCORES

Arnold Palmer	$20,000	68-71-70-74—283

Le Mans Start Is Finished

PARIS, Dec. 1 (Reuters).—Drivers in the Le Mans 24-Hour car race will not make the spectacular dash across the track to their cars at the start of next year's race, organizers said today.

Instead, the first driver in each car will get in two minutes before the start, and the co-driver will race to the car to connect the battery at the drop of the starting flag.

The change in the start is the result of criticism that the old style was dangerous.

Restructuring Is Topic A at Annual Baseball Meetings

By Leonard Koppett

NEW YORK, Dec. 1 (NYT).—Baseball's annual convention, the winter meetings, may produce significant changes in the way the game-sport-business is organized this week. Today and tomorrow, the annual minor-league meetings will take place in Fort Lauderdale, and from Wednesday through Saturday the major leagues will hold their sessions at the Americana Hotel in Bal Harbour, a northern portion of Miami Beach.

The most important issues may arise only on the last day. Commissioner Bowie Kuhn has asked the club owners and other officials to set them aside for consideration of proposals to restructure the entire administration of the game. There are deep differences among the owners on the question of restructuring, and it is even possible that the discussion will be postponed if peaceful consideration doesn't seem likely. But it is the most important long-range question baseball faces.

Essentially, the restructuring plan calls for broadening and strengthening the commissioner's functions and reducing the autonomy of the league presidents. It envisions bringing under one roof, physically as well as in the chain of command, the league offices and the National Association (the parent body of the minor leagues) with the commissioner in direct command. Major league umpires would then become a single entity and countless other items of operation would be standardized, unified and perhaps streamlined.

Traditionalists, however, oppose weakening the independence of the leagues, as now represented by their presidents in separate offices.

Inter-League Play

A related issue, which is on the agenda of the regular meetings, is the possibility of inter-league play, desired by the American League and resisted by the National.

Also related is the decision to be made by Charles S. (Chub) Feeney, vice-president of the San Francisco Giants, who has been offered the National League presidency as successor to Warren Giles, who is retiring. Feeney has been a member of the re-structuring committee all along, and was a leading candidate for the commissionership before it was given to Kuhn last February after supporters of Feeney had deadlocked with supporters of Mike Burke, president of the New York Yankees. Feeney is reluctant to accept a president's post if it is to be down-graded at the time he takes it.

While re-structuring is the main long-term question, the most important immediate problem is negotiation with the Players' Association. The owners, none of whom sit in on the negotiations with Marvin Miller, who represents the players, will get a full report from their own committee, headed by John Gaherin.

The key issue, in terms of urgency, is length of schedule. The agreement with the players, which encompasses minimum salaries, re-examination of the reserve clause, and all other matters except pension benefits, expires Dec. 31. Under the old agreement, the owners are committed to cooperating with the players on the schedule, which the players want shortened.

Schedule Ready

But some owners, especially in the National League, are adamant about sticking to the 162-game pattern which the players oppose bitterly. The 1970 schedule, already drawn without consultation with the players, must be finalized soon. Other issues can be discussed at greater length without interfering with baseball operations, whatever the disagreements, but the schedule must be settled quickly.

The players will not be represented at the meetings here. They will have their own meeting in San Juan, Puerto Rico, Dec. 13-14, by which time Miller will have received an up-to-date response from Gaherin's committee on the owners' position. If, at that point, serious differences remain, a train of events that could lead to a player strike next spring might be set in motion.

Less dramatic than these two matters will be the routine but important business. Today, the draft of minor league players will take place. (Teams in a higher classification can draft players from a lower league at a set price. Tomorrow will be devoted to the annual convention meeting of the minors.

When the majors meet, as individual leagues and together, they will consider a host of items previously discussed by the general managers at their own meeting a couple of weeks ago. These will cover everything from experimenting with a livelier ball to checking the candlepower of the lights in major league parks to exempting the Mexican leagues from the draft to various adjustments in baseball law to finishing interrupted games.

And, with everyone on hand, player trades are likely.

Rams Featured In Paris Film

PARIS, Dec. 1.—Last week, TWA and American Express showed the Minnesota Vikings. This week, their NFL film will feature the Los Angeles Rams, which is very timely. The two teams meet next Sunday and then will play later this month for the Western Conference championship.

The free showings Wednesday of the Rams' 23-17 victory over the Philadelphia Eagles will be at Cinéma Le Triomphe, 92 Avenue Champs-Elysées, at 12:15 and 1 p.m.

Name of the Game

CONCORD, N.H., Dec. 1 (AP).—The New Hampshire Fish and Game Department released its deer season scorecard: A total of 7,306 deer killed, four moose, two persons, an undetermined number of domestic livestock, 20 deer shot at night by artificial light, 10 deer stolen from meathooks at campsites, an undetermined number of accidental gunshot wounds, 15 lost hunters, and one pony wounded.

The Scoreboard

MOTORBOAT RACING—At Lake Havasu City, Ariz., Cesare Scotti, a 33-year-old marina operator from Nesso, Italy, won the $50,000 outboard world championship, covering a race record 584 miles (940 kilometers) in two days of competition over a four-mile Colorado River course. Averaging 73 miles an hour (117.48 k.p.h.), Scotti broke the record of 512 miles (824 kms.) set by last year's winner, Kenny Itson of Bridgeton, Md. Scott, piloting a 22-foot, twin-engine craft, earned $15,000. Second prize of $7,000 went to Johnnie Sanders of Abilene, Texas, who covered 580 miles (933 kms.). Bill Sirois of Miami and Dick Sherrer of Seal Beach, Calif., each went 572 miles (920 kms.). Only 45 boats from the field of 114 were running at the finish.

BOXING—At Melbourne, Australia's Bobby Dunlop, the Empire light-heavyweight champion, survived a 12th-round knockdown to retain his title with a 15-round decision over Canadian Al Sparks. Sparks, 32, had the title within his grasp in the 12th round when he dropped Dunlop to the canvas with a right cross. Dunlop took the mandatory 8-count and fought back strongly with Sparks tiring over the last few rounds.

TRACK AND FIELD—At Inglewood, Cal., Olympian Doris Brown, a 27-year-old physical education teacher from Seattle, won the national AAU women's cross-country title for the third time in 10:56.2 over a hilly two-mile course.

WEIGHT LIFTING — At Budapest, Hungary's top athlete, Imre Foldi, set a world record in the flyweight category at the Hungarian national championships with an aggregate of 370 kilograms (127.5 in the press, 105 in the snatch and 137.5 in the jerk). The Hungarian world and European title-holder thus improved his aggregate world flyweight record of 367.5 kilograms, which he has held for 1 1/2 years together with Nassiri of Iran and Chetin of the Soviet Union.

Muhammad Ali
a/k/a

Cassius Clay

By Robert Lipsyte

NEW YORK, Dec. 1 (NYT).—Like so many people, Malcolm X found himself smiling when he talked of Cassius Clay, even though his own thoughts of the man he had helped convert to Islam were tinged with sadness. In a rare film interview on the subject, Malcolm said that, until Clay won the world heavyweight championship, Negroes had been given "heroes with no confidence." Then came Cassius, confident, skilled, proud of his blackness, and the "power structure" saw it would have trouble if black men were allowed to identify with him. The ultimate tragedy of Clay, in Malcolm's mind, was that he had the most powerful worldwide image of any black man of his time, and he did nothing positive with it.

That interview is included in a recently released film about Clay's first two championship years, 1964 and 1965, called "Float Like a Butterfly, Sting Like a Bee." As a documentary of what Clay was, it is interesting. And currently in preview, scheduled to open tomorrow night, is a musical called "Buck White" for those interested in what Muhammad Ali is doing during these days of maneuver and appeal in his draft evasion case.

In advertisements for the show, and on the marquee of the George Abbott Theater on West 54th Street, the fighter is billed as Muhammad Ali a/k/a Cassius Clay. The Muslim name is in tiny letters, his legal Christian name is usually larger than the play's title. He has said that Ali is a holy name, Clay a "commercial" name and the play a commercial undertaking with "no prestige."

What with his insistence upon Ali for prizefight advertisements, his current suspension from the Muslims, and the Muslims' strong disapproval of both boxing and the Broadway stage, his reasoning is a puzzler. But it's the a/k/a, the also known as, that provides the irony, because within the context of the musical and his role in it, he is as much Buck White as he is Clay or Ali.

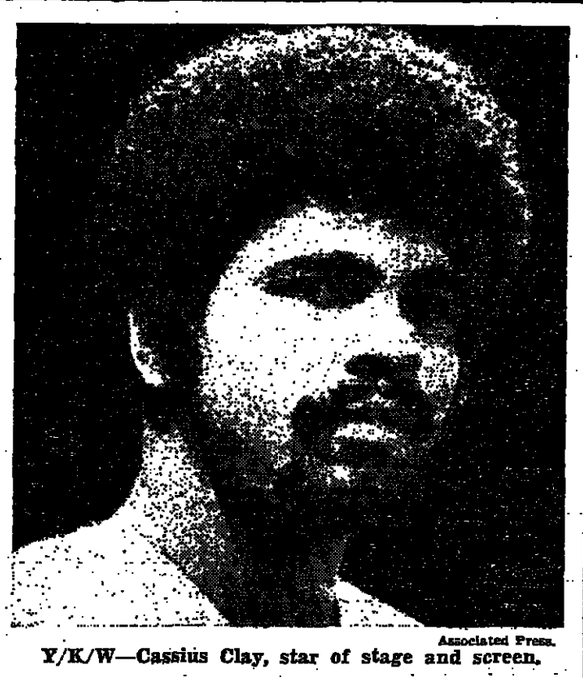

A B.A.D. Man

Based on the well received off-Broadway play "Big Time Buck White," the musical concerns a meeting of B.A.D. (Beautiful Alleluiah Days), a government-funded "inner city social group" staffed by six ghetto stereotypes: a wineheed, a drag queen, a petty racketeer, a black leather hostile, the light-complexioned attaché-cased hustler who invented the organization, and its meal ticket, the spellbinder Buck White.

Ali makes a brief appearance at the end of the first act, and he is on stage throughout the second act. Although he wears a moustache, beard, Afro wig and a flowing garment, he is recognizable, and at his fiercest playacting moments his sweet boyishness obtrudes. The play was seen at a preview last Wednesday night, and the predominantly black audience, including many lively and attentive youngsters, seemed to receive him well.

The songs are not very good, but they are not hard to sing, either, and Ali, who cut records years ago, has a pleasant and adequate and clearly understandable voice. He follows a long tradition of heavyweight champions treading the boards, and he never embarrasses by his actions on stage. He has grace, presence, and that charm, which works against his role, but not against him.

Just as Buck White is B.A.D.'s drawing card, the rafter-shaker who packs the group's meetings and treasury, so is Ali the musical's boxoffice lure. And this is the problem. With a commanding professional actor as Buck White, the role would be more convincing. Yet without Ali as Buck White, there is much less reason to see this show.

Associated Press.

Y/K/W—Cassius Clay, star of stage and screen.

As Buck was to B.A.D. and Ali is to "Buck White," so was Cassius Clay to boxing. William Klein's 94-minute film, which opened last week, captures his luminosity during the time of his two fights with Sonny Liston. There are interesting, although not enlightening, scenes of Clay romping with the Beatles, psyching Liston at the weigh-in, training, relaxing and chattering on "Big Red," his bus.

Klein's latest contribution is through revealing little interviews: the Louisville Syndicate member who calls Clay "a little ungrateful" after all that his millionaire backers did for him; the black Morehouse professor who suggests that white America will "let you do anything as long as you show gratitude;" the Muslim minister who says Ali scares the establishment because he "crashed out of a prison of ignorance we have been in for 400 years"; the Harlem Youth acting class taking roles in Ali's life, and, of course, Malcolm X.

But Klein is very glib with his judgments, wrapping the Louisville owner's face around a lens until he looks decadent, giving the Muslims a rationality they never earned, so it is hard to trust him completely. He offers neither hard objectivity nor hard bias. And, greatest fault, the film, like the musical, doesn't offer us anywhere near the pure entertainment we've always gotten from you know who.

Jets' Corner Turned By Lamonica Rascals

By Dave Anderson

W YORK, Dec. 1 (NYT).—violent, sometimes savage gle sanctioned as entertain-by the American Football ue, the New York Jets lost e Oakland Raiders, 27-14, yes-ay before a league record crowd ,885 at Shea Stadium.

hteen penalties, including ten st the Western Division rs, were paced off by the als for a total of 241 yards, 30 short of the league record, how no serious injuries oc-d, although the Jets' pride as champions was wounded by tender to their throne for the t time in three games.

yle Lamonica, the husky r quarterback, pierced the right cornerback, Cornell n, with two touchdown passes arren Wells on plays of 34 0 yards. Lamonica scored the Raider touchdown on a one-rollout and George Blanda field goals of 37 and 20

onica produced 323 yards 19 completions in 28 passes e Raiders stayed one-half ahead of the Kansas City , the Jets' conqueror two ago, in their division.

Jets wasted an opportunity ch first place in the Eastern n, but a victory or tie against the Houston Oilers or the Dolphins in their remain-mes will assure their return a for the post-season play-ener Dec. 20 against the n runnerup.

a bone-chilling breeze that swirled the dust off the in-area, the Raider defense the Jet offense to a total y 238 yards. Joe Namath ted only ten of 30 passes. ath collaborated with Bake , replacing the injured Don rd, on a 54-yard touchdown at squared the score follow-ella's first touchdown. But Raiders added their other two owns before Bill Mathis on a one-yard smash im-ely after Turner's 31-yard on.

Raiders were aided by three istakes—a roughing-the-penalty against John Elliott, le by Mike Battle and a penalty against Winston t's third-down infraction provided the Raiders with a first down at the Jets' 24, instead of Blanda trying a 46-yard field goal. Four plays later, Lamonica scored on third down. Battle's fumble of the ensuing kickoff positioned Lamonica's 30th touchdown pass of the season.

And when Namath threw a first-down pass behind Turner on a square-out pattern, "a cardinal sin on an out," according to Namath, it was intercepted by Nemiah Wilson, the covering cornerback.

In a span of nearly ten minutes, the Jets had possession for only one play, Namath's interception. But after Mathis's touchdown, Hill's holding penalty erased a Jet penetration to the 21 on Turner's 12-yard reception. As a result, Jim Turner's field-goal attempt from the 45 was wide.

In the second half, Turner was limited to two other long-range attempts, from 52 and 48 yards, as the Jet offense gained just 78 yards, only 27 on passes.

Meanwhile, the Jet pass-defense developed a porousness again, with Gordon victimized by Wells for 152 yards on five receptions.

Weeb Ewbank, the Jet coach, refused to make Gordon the scapegoat of the world champions' fourth loss, all to Western opponents.

"Cornell didn't lose the game for us," Ewbank said. "There comes a time when you have to congratulate the opponent."

Patriots 31, Dolphins 23

Defensive back Larry Carwell intercepted two passes setting up fourth-quarter scores and Mike Taliaferro threw three touchdown passes as Boston downed Miami, 31-23. Carwell led a rugged defense that paved the way for three touchdowns and a field goal and forced a safety as the Patriots fought successfully to keep alive their slim hopes for a spot in the AFL playoffs. Early in the fourth period, Carwell picked off a Rick Norton pass on the Miami 19 and went to the 2. Jim Nance went over two plays later for his second touchdown of the quarter to give Boston the lead for good with 10:21 to play. The second Carwell theft came late in the period on the Miami 41 and this time he returned to the 15. Gino Cappelletti kicked a 13-yard field goal moments later.

Art Buchwald

TV News 1970

WASHINGTON.—It is 1970, the networks have all re-examined their news policies as requested by the administration and here is the result.

"Direct from our newsroom here in the White House, is the evening news with Ronald Ziegler and Herb Klein in Washington, Strom Thurmond in Athens, Georgia, and Ronald Reagan in Sacramento, California. And here is Ron Ziegler."

Buchwald

"Good evening, ladies and gentlemen. All was peaceful and tranquil at the White House today. President Nixon worked in his office conferring with advisers and visitors. The President lunched with Mrs. Nixon and took a walk in the Rose Garden, stopping to talk with a 6-year-old boy who was peeking his head through the fence. The boy, whose name was Michael Redfern, of Boise, Idaho, told the President he was a member of the Silent Majority and supported his efforts to find a just and honorable solution to the war in Vietnam and that he was proud of the job the President was doing. The President was so pleased he presented Michael with a meat-loaf sandwich. And now to Herb Klein in the Executive Building."

* * *

"Thank you, Ron. The latest Gallup Poll has just revealed that 98 percent of the people support President Nixon's domestic policies. This was two points up from last month when the President's popularity sagged momentarily, when milk was raised to a dollar a quart. And now to John Volpe at the Department of Transportation."

"Administration officials said they were terribly pleased with the progress being made on the SST airplane. In a test yesterday only 7,000 windows were broken in Boston as opposed to previous tests when 10,000 windows were shattered in Providence, Rhode Island. Engineers hope to have all the bugs worked out of the SST by 1987, at which time the costs, now running at four billion dollars, will start going down.

"There was more integration in the South this week and for that story we go to Strom Thurmond in Athens, Georgia."

"Despite Justice Department pleas to give the school boards more time to work out a reasonable plan, two black children were admitted to a school in Mississippi yesterday. The integration took place peacefully and without violence and administration officials said they were very pleased. The institution admitting the black students was the Mountain Valley School For the Blind. And now to Atlanta, Georgia, and our correspondent John Mitchell."

* * *

"Thanks, Strom. Governor Lester Maddox entertained leaders of the Republican party at a picnic on the statehouse steps today and as an added treat sang 'God Bless America'. The Republicans denied that this had anything to do with the so-called 'Southern strategy' of the party, but admitted they asked ex-restaurateur Maddox to cater the 1972 Republican convention and serve fried chicken.

"Unruly students demonstrate in California. For that story we go to Ronald Reagan in Sacramento."

"Unruly students, most of them with beards and long hair, demonstrated today when the Board of Regents ruled that anyone protesting anything in California would automatically lose his driver's license. Six crop-dusting airplanes carrying a mixture of DDT and tear gas were used to break up the mobs, which were then strafed by fighter planes from the California National Guard. And now back to Ron Ziegler in the White House."

* * *

"Thank you, governor. President Nixon was asked today at an impromptu press conference whether he supported Vice-President Spiro Agnew's plan to withhold Social Security to anyone over 65 criticizing the administration and living within the geographical confines of New York or Washington, D.C. The President said he was aware of the speech but had no comment. And that's the way it is May 12th, 1970. This is Ron Ziegler saying good night."

1.1 Million Visit Greece

ATHENS, Dec. 1 (Reuters).—A total of 1,112,432 tourists visited Greece during the first nine months of this year, a 30.3 percent increase on the corresponding period last year.

The Business of Icon Smuggling

By Richard C. Longworth

VIENNA (UPI).—He is well-heeled, well-traveled and a specialist in a new kind of East European foreign trade.

But Stefan R.'s export-import statistics never show up in the reports of the governments of the Communist countries where he does business.

Stefan is an icon smuggler—one of a growing fraternity of petty criminals who make a living, sometimes a good one, by servicing markets which have been closed down by government restrictions.

Icons, the stylized, richly ornamented religious paintings found in many East European countries, especially those where the Orthodox faith has strong roots, are usually painted on wood and sometimes have inlays of semi-precious stones and overscreens of gold or silver.

Like religious work everywhere, many old icons are both fine art and part of Eastern Europe's historical heritage.

"So the governments declare them national treasures and say no one can take them out of the country," Stefan said happily over a scotch on the rocks—his favorite drink—in the bar of an East European hotel. "And that's good business for me.

The Family Icons

"I go to a country and I check with my contacts and I find out which people have run out of money and might want to sell off some of the family icons for more money than they can get from the state.

"Then I go to their homes," he said. "I buy only from private collections. I make an offer and I take the icons."

But the trick is in getting the icons to the West. Communist export restrictions have begun to dry up the Western icon market and thus raised average prices to the point—about $500 for a good one—where the Stefans of the world can make a nice profit.

"There are lots of ways to get them to the West," Stefan said. "Sometimes I put them in a knapsack, pose as a student and hitchhike across borders. On trains, I hide them behind partitions in the compartments or toilets. Sometimes I even put them in refrigerator cars on trains—but only for a short time, until we get across the border, because icons do not like cold temperatures."

Thirteenth-century icon, "Madonna Enthroned," from the Mellon Collection, National Gallery of Art, Washington, D.C., 32 by 19 1/2 inches.

The bribing of border guards and customs officials also is a regular part of his business expenses, he said.

Stefan, who was born in Eastern Europe, is 25 years old. Short and swarthy, he dresses casually and well and is fond of women—another heavy expense, he says.

Ups and Downs

Profits, he said, accepting another scotch, "have their ups and downs. I once lived in Paris for two months without money. Now I have four cars in four countries"—including Italy, where he makes his home and where he has a helper who sells the icons for 20 percent of the take.

His big ambition, he said, is to buy an automatic car-washing rig in Italy and go into legitimate business in his homeland.

Stefan is an enthusiastic businessman. He travels constantly through Romania, Hungary, Bulgaria and Czechoslovakia—the source of most of his icons—and speaks a half dozen languages more or less fluently.

He prefers to deal in icons but will barter any sort of contraband—old weapons, precious coins or foreign currency. He hustles constantly and tries to short-circuit the dangerous border crossings—and his partner in Italy—by selling his wares to Western tourists whom he meets in East European hotels.

Few of Eastern Europe's underground traders operate on such an international scale as Stefan. Many keep the black markets in their own countries going by specializing in hard-to-get consumer goods, Western clothes or liquor.

PEOPLE: *Dean's Pop Opera On Life of Christ*

Dean Martin Sullivan of St. Paul's Cathedral in London, who last year parachuted from a spire to advertise a youth festival, has broadened his efforts to acquire an audience. He's now planning a pop opera called "Jesus Christ," to be presented in the cathedral next year. The title song will be sung by Murray Head—now appearing in the London production of "Hair"—and has the lyric: "Jesus Christ, super star, do you think you're what they say you are?" Says the dean, "If you can't talk about Christ in pop terms, then you've got the wrong image of Him."

* * *

It may have been on a less majestic scale but the Rev. John Harvey decided to mix a bit of cooking, magic and show business with his religion to celebrate Advent Sunday. He put on a false beard, apron and a chef's hat and started mixing a cake as his London congregation roared with laughter. Then the minister popped the batter into a false oven and instantly produced a perfect cake. Later, he admitted the cake had been baked earlier. On with the show.

* * *

Aristotle Onassis has bought the island of Whale Cay in the Bahamas, reports the New York Daily News. The island, a private 900-acre preserve, is 40 miles from Nassau. Whale Cay had belonged to Jo Carstairs, the Standard Oil heiress, the newspaper said.

* * *

Polish scientists are planning to sail a primitive 82-foot craft from Casablanca to Mexico to prove North Africans could have settled in the New World 4,000 years ago. If all goes well, the 4,500 mile journey will carry the crew south from Casablanca to Senegal, across the Atlantic and through the Caribbean to Mexico. Dubbed "Poland's Kon-Tiki" by the press, the expedition is to be launched in 1971 by the Polish Academy of Sciences.
